This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

SOURCES OF THE AGRICULTURAL IMPORTS OF THE UNITED STATES, 1894–1898.

INTRODUCTION.

Bulletin No. 17 embraces a series of statistical tables[1] showing in the greatest possible detail the quantities and values of the various agricultural products imported into the United States from the several countries of supply during each of the five fiscal years 1894–1898. The tables are similar in form and arrangement to those printed in Bulletin No. 16,[2] which the present report is intended to supplement. As the list of articles included is practically complete, it has been possible, by summarizing the various items for each country, to arrive at the value of the agricultural produce received from every one of the several sources. The summary figures thus obtained probably comprise the first published statement of the total values of American agricultural imports, by countries.

PRINCIPAL SOURCES OF THE AGRICULTURAL IMPORTS.

During the five fiscal years 1894–1898 the agricultural imports of the United States had an average annual value of $368,748,457. Sugar, coffee, hides and skins, wool, silk, vegetable fibers, fruits, tea, tobacco, and wines were the articles imported most extensively. Measured in value, these ten items formed over four-fifths of our total import trade in agricultural products for the period mentioned, their combined value averaging above $300,000,000 a year.

Of this sum more than one-half was paid for two commodities—sugar and coffee. The average yearly value of the sugar imports for 1894–1898 amounted to $90,418,685, while that of the coffee imports was recorded at $83,570,106.

The countries that contribute most to the supply of these two products are naturally the leading factors in our agricultural import trade. According to the statistics for 1894–1898, Brazil, which furnishes about two-thirds of the coffee imported into the United States, headed the

[1] The statistics given in the present bulletin are all based upon the official import returns published by the Bureau of Statistics, United States Treasury Department.

[2] Bulletin No. 16, "Distribution of the Agricultural Exports of the United States, 1894–1898."

Digitized by Google

list. Our agricultural imports from this South American country during the five years had an average annual value of $59,617,524, or 16 per cent of the total valuation placed upon imported products of agriculture. Aside from coffee, the leading articles were sugar and hides.

Cuba, the principal source of the sugar purchased by the United States, ranked next to Brazil in importance. The average yearly value for 1894–1898 of our agricultural imports from the island amounted to $37,403,232, or 10 per cent of the total. After sugar, the most important items were tobacco and fruits.

Under normal conditions, our imports of agricultural produce from Cuba are much larger than is indicated by the average for 1894–1898. During the period mentioned there was a remarkable falling off, the import value for 1898 amounting to only $13,158,036, as compared with $72,451,355 for 1894. In 1894 Cuba stood foremost among the sources of our agricultural imports, the products received from the island during that year exceeding in value those from Brazil.

After Brazil and Cuba, according to the returns for 1894–1898, the United Kingdom was the most important contributor to our import trade in the products of agriculture. The average annual value of the agricultural matter purchased from the United Kingdom amounted to $33,084,065, or about 9 per cent of the total. A large part of these imports consisted of produce of British dependencies that was reexported by the mother country. Wool and hides were the leading articles. Feathers, cotton, tea, flax, sugar, and spirituous liquors were also items of considerable importance.

Germany ranked fourth among the sources of supply, the agricultural imports from that country during 1894–1898 having an average yearly value of $23,004,787, or about 6 per cent of the total. Aside from beet sugar, which formed the principal item, the most important articles were hides, hops, rice and rice flour, wines, bristles, coffee, and spirituous liquors. Some of the leading products received from Germany were reexports.

China was fifth in importance among the sources of our agricultural imports, furnishing nearly 5 per cent of the total, with an average yearly value of $17,278,849. Tea and silk were the principal items. Of the tea imported during 1894–1898, more than one-half came from China. Other Chinese products received in considerable quantities were wool, hides, opium, and rice.

Our agricultural imports from Japan in the period mentioned were nearly as large as those from China, the average yearly value being $16,892,735. Silk was decidedly the most important item. About one-half of our importations of this product for 1894–1898 came from Japan. Japan also furnished over a third of the tea imported. Aside from silk and tea, the only article of much importance was rice.

From France we imported during 1894–1898 products of agriculture that averaged $16,606,846 a year in total value. Wines, hides, wool, silk, fruits and nuts, and vegetable oils were the leading items.

Digitized by Google

Italy sold us agricultural products having an average annual value for the five years of $14,057,239. The principal articles were silk, fruits and nuts, argols, vegetable oils, hemp, macaroni, cheese, and wines.

The agricultural imports from Mexico had an average yearly value of $13,094,462. Coffee constituted the largest item. The imports of vegetable fibers were second in value, sisal grass being the leading variety. Other items of importance were cattle, hides, vanilla beans, fruits, and tobacco.

From the Dutch East Indies there were agricultural imports to the average yearly value of $12,600,172. A large part of this sum was paid for cane sugar. The only other imports of much importance were coffee and spices.

The Hawaiian Islands were the source of agricultural imports having an average value of $12,073,440 a year. After sugar, which formed the principal part of the trade, the principal items were rice, coffee, bananas, and hides.

Our imports of agricultural produce from the British West Indies had an average annual value of $9,901,839. Sugar was also the chief import from this source. Among other articles the most important were bananas, oranges, cocoanuts, cocoa, coffee, and spices.

From Canada we imported a large variety of farm products, the total value averaging $9,883,491 a year. The leading items included cattle, sheep, and horses, hides, wool, hay, potatoes, beans and peas, tobacco, barley, and flax.

The Netherlands furnished agricultural products to the average yearly value of $8,961,119. Sumatra tobacco comprised about half of these imports, the remainder consisting chiefly of sugar, coffee, cocoa, vegetable oils, rice, bulbs, seeds, spices, hides, cheese, and flax.

From the British East Indies agricultural imports with an average annual value of $8,910,011 were received. Jute, indigo, hides, vegetable oils, coffee, tea, and spices were the principal items.

Our agricultural imports from Venezuela averaged in value $7,893,938 a year. They consisted largely of coffee, Venezuela ranking next to Brazil as a source of supply. The only other items of much importance were cocoa, hides, and feathers.

Argentina supplied imports of farm produce having an average annual value of $7,361,272. Animal products, such as hides, wool, gut, and bones, formed the principal part of the trade.

From Egypt there were agricultural imports averaging $5,020,765 a year. Egyptian cotton was the leading factor. Sugar and goatskins were about the only additional items of value.

The several countries mentioned above include all the sources from which products of agriculture having an average annual value in excess of $5,000,000 were imported during 1894–1898.

Our agricultural imports from the Philippine Islands, consisting

Digitized by Google

chiefly of Manila hemp and sugar, averaged very close to $5,000,000, however, the exact figures being $4,925,669.

Of the remaining sources of supply the most important, with the average yearly value of the agricultural products furnished, were as follows: Belgium, $3,674,528; Colombia, $3,643,505; British Guiana, $3,373,988; British Australasia, $3,330,193; Costa Rica, $3,086,418; European Russia, $2,522,463; Uruguay, $2,480,820; Spain, $2,367,991; Santo Domingo, $2,292,938; Puerto Rico, $2,271,099; Guatemala, $2,105,391; and Austria-Hungary, $2,011,373.

The only other sources from which the United States received during 1894–1898 agricultural imports averaging above $1,000,000 in value were Asiatic Turkey, Salvador, Aden, European Turkey, Switzerland, Dutch Guiana, and British Africa.

SUMMARY STATEMENT, BY COUNTRIES, OF TOTAL AGRICULTURAL IMPORTS.

Following is a summary table that shows the total value of the agricultural products imported into the United States from each one of the various foreign countries and sources of supply during the five fiscal years 1894–1898:

Value of the agricultural products imported into the United States from the several foreign countries during each fiscal year from 1894 to 1898, inclusive.

Countries from which imported.	Years ended June 30—					Annual average, 1894–1898.

SOURCES FROM WHICH INCREASED IMPORTS WERE RECEIVED.

Although the total value of the agricultural imports amounted to only $314,291,796 in 1898[1] as compared with $364,433,627 in 1894, a considerable increase was recorded from several of the leading sources of supply. Japan, China, and the Hawaiian Islands afforded the most

[1] The agricultural imports for 1898 were smaller than would normally have been the case, owing to the fact that in 1897 unusually large stocks of some products, notably wool and sugar, were hurried in to avoid the higher duties of the pending tariff legislation.

Digitized by Google

striking instances of a growing trade. The value of the agricultural products imported from Japan rose from $14,035,637 in 1894 to $20,065,384 in 1898, while for the same years there was an advance in the case of China from $14,282,829 to $18,346,474, and in the case of the Hawaiian Islands from $10,020,943 to $17,142,508.

Our agricultural imports from the United Kingdom were unusually small in 1894, having a value of only $19,830,498. They increased during 1895, 1896, and 1897, attaining a value of $49,783,159 for the last of these years, and then dropped in 1898 to $25,748,289.

Among the other countries from which increased purchases of agricultural produce were made in 1898 as compared with 1894, some of the most notable, with the gains recorded, were as follows: Dutch East Indies, from $11,160,203 to $14,272,843; British East Indies, from $6,687,484 to $11,005,218; Venezuela, from $3,281,850 to $7,573,296; Argentina, from $3,403,881 to $5,810,954; Egypt, from $1,980,563 to $4,825,509; and Colombia, from $1,806,861 to $4,546,839.

SOURCES FROM WHICH DIMINISHED IMPORTS WERE RECEIVED.

Of the sources from which products of agriculture were received in diminished quantities during the five years, Cuba was the most conspicuous. As a result of the disturbed conditions that prevailed on the island, our agricultural imports from Cuba declined in value from $72,451,355 in 1894 to only $13,158,036 in 1898, a falling off of nearly $60,000,000.

Next to the Cuban trade, the most important decline occurred in the case of Brazil, our agricultural imports from that country showing a loss of more than $20,000,000. The value for 1898 was only $46,460,192, as against $68,100,195 for 1894.

Among the other instances of decline, some of the most noticeable were as follows: Germany, from $19,981,713 to $14,183,922; British West Indies, from $12,096,902 to $9,433,064; Philippine Islands, from $6,992,299 to $3,772,835; and Salvador, from $2,903,420 to $753,893.

IMPORTS FROM THE TROPICS.

Over one-half of the agricultural produce imported into the United States during 1894–1898 came from countries that lie wholly or in chief part within the tropics. These imports, consisting largely of products that can not be supplied from our own soil, had an average annual value for the five years of $192,732,457. From countries outside of the tropics there were during the same period average yearly imports of agricultural products to the value of $176,016,000. An important part of these latter imports, however, undoubtedly consisted of tropical products received indirectly as reexports.

The value of the products of agriculture imported directly from tropical countries during each of the five years 1894–1898 will be seen from the following statistics:

SOURCES OF THE AGRICULTURAL IMPORTS, BY CONTINENTS.

A classification of the agricultural imports for 1894–1898, by continents, shows that about 30 per cent came from Europe, 23 per cent from South America, 23 per cent from North America, 16 per cent from Asia, 5.5 per cent from Oceania, and less than 2 per cent from Africa.

The value of agricultural products received from European countries increased from $87,142,996 in 1894 to $152,479,699 in 1897, and then fell in 1898 to $87,372,948. The average for the five years was $109,781,213. Reexports of produce derived originally from other continents played an important part in the imports received from Europe.

Our agricultural imports from South America in 1894 were valued at $84,258,491. There was an increase to $93,184,513 in 1895, but during each succeeding year the value declined, until in 1898 it fell as low as $71,616,117. The annual average amounted to $86,537,267.

The imports of agricultural produce into the United States from other North American countries declined nearly one-half during the five years, the value for 1898 amounting to only $56,701,246, as compared with $121,138,638 for 1894. The average was $85,335,647 a year.

In the agricultural imports from Asia, on the other hand, there was a marked increase, the value of the products received from that continent advancing from $49,827,752 in 1894 to $67,434,863 in 1898. The five years showed an annual average of $59,935,646.

An important growth also occurred in the importation of agricultural products from Oceania, the value for 1898 amounting to $24,439,976, while that for 1894 was only $19,287,284. The yearly average came to $20,427,765.

Digitized by Google

Our agricultural imports from Africa rose in value from $2,778,466 in 1894 to $10,357,001 in 1896, and then declined to some extent in 1897 and 1898, the record for the latter year being $6,726,646. There was an average of $6,730,919 a year.

The following table shows the value of the agricultural products imported into the United States from the several continents during each year from 1894 to 1898, inclusive:

Of the agricultural products imported into the United States from Europe during 1894–1898, slightly more than one-half, measured in value, came from two countries, the United Kingdom and Germany. The former country was the source of 30 per cent and the latter of 21 per cent. France furnished 15 per cent, Italy 13 per cent, the Netherlands 8 per cent, Belgium 3.4 per cent, European Russia 2.3 per cent, Spain 2.2 per cent, Austria-Hungary 1.8 per cent, and European Turkey 1.2 per cent. Following is a table showing the imports from the several European countries in each of the years mentioned:

Value of the agricultural products imported into the United States from the countries of Europe during each fiscal year from 1894 to 1898, inclusive.

Over two-thirds of our agricultural imports from South America nad their source in Brazil, that country supplying nearly 69 per cent of the total. About 9 per cent came from Venezuela, 8.5 per cent from Argentina, 4.2 per cent from Colombia, 3.9 per cent from British Guiana, 2.9 per cent from Uruguay, and 1.2 per cent from Dutch Guiana. The imports from the various South American countries during each of the five years are shown by the following statistics:

Value of the agricultural products imported into the United States from the countries of South America during each fiscal year from 1894 to 1898, inclusive.

a Not separately stated.

Among the North American sources of our agricultural imports, Cuba was decidedly the most important, furnishing 44 per cent. The West Indies entire supplied 62 per cent. Mexico was the source of 15.3 per cent, the British West Indies of 11.6 per cent, Canada of 11.6 per cent, Costa Rica of 3.6 per cent, Santo Domingo of 2.7 per cent, Puerto Rico of 2.7 per cent, Guatemala of 2.5 per cent, Salvador of 2.1 per cent, Nicaragua of 1 per cent, and Haiti of 1 per cent. The Central American countries, as a group, furnished 10 per cent. In the following table the imports from the several North American sources are shown for the five years:

Value of the agricultural products imported into the United States from the countries of North America during each fiscal year from 1894 to 1898, inclusive.

SOURCES OF THE AGRICULTURAL IMPORTS, BY ARTICLES.

The tables presented on the following pages embrace all the agricultural imports of the United States during the five fiscal years 1894–1898, exhibiting for each article the extent of the annual importations received from the various sources of supply. For convenience in classification the articles are divided into two groups, consisting respectively of animal matter and vegetable matter. The tables are arranged in two series, the first relating to the values and the second to the quantities of the articles imported. To facilitate comparison, cross references are given from each table of values to the corresponding table of quantities, and vice versa. In some cases, however, values only are given, no returns being made as to quantity. An index to the articles

Digitized by Google

covered by the tables is printed on pages 117–118. The tablcs are as follows:

Values of the agricultural imports of the United States (animal matter), by articles and countries, during the five fiscal years 1894–1898.

OUR TRADE WITH JAPAN, CHINA, AND HONGKONG, 1889–1899.

GROWTH OF THE TRADE.

One of the most striking features of the foreign trade growth recently enjoyed by the United States has been the wonderful development of the commerce with Japan and China. During the fiscal year 1899 the value of the merchandise exchanged with these two countries, including the port of Hongkong, reached as high as $87,305,688. These figures were decidedly in excess of any previous record. The value for 1889, ten years before, was little more than half as large, amounting to only $46,294,167. The four years following 1889 witnessed a steady increase that finally culminated in 1893 with a record of $60,281,386, the highest up to that time. In the fiscal year 1894, during which our importations were greatly curtailed as a result of the prevailing financial depression, the trade dropped to $51,513,149. During 1895 there was a recovery to $57,509,859, and for each subsequent year the returns showed an important increase. The value amounted in 1896 to $68,281,985, in 1897 to $76,577,410, and in 1898 to $82,943,077, while in 1899 the record-breaking figures already quoted were reported.

Of the $87,305,688 valuation placed upon our trade with Japan, China, and Hongkong during 1899, $47,815,035 represented the imports into the United States and $39,490,653 the exports from this country. The excess of imports over exports amounted to $8,324,382. Formerly the excess was much larger, as, for instance, in 1889, when the imports were valued at $35,196,670 and the exports at $11,097,497, a difference of $24,099,173.

By comparing the figures for 1889 and 1899 it will be seen that the exports have increased much more rapidly than the imports. In the decade ending with 1899 there was a gain of $28,393,156, or 256 per cent, in exportation, while the increase in importation amounted to only $12,618,365, or 36 per cent. During the last few years, in fact, the imports disclosed an actual falling off, the value for 1899 being $1,164,131 less than that for 1896, which was recorded at $48,979,166. Our exports, on the other hand, amounting to $19,302,819 in 1896, were more than doubled during the next three years, showing a gain of $20,187,834.

DISTRIBUTION OF THE TRADE AMONG JAPAN, CHINA, AND HONGKONG.

The commerce carried on with Japan during 1899 amounted in value to $43,981,181, and was slightly larger than the combined trade with China and Hongkong, which had a value of $43,324,507. Of the trade recorded with Hongkong, amounting to $10,211,799, a considerable portion should undoubtedly be credited to China. The value of the direct trade with China was $33,112,708.

TRADE WITH JAPAN.

During the years 1889–1899 our trade with Japan showed an increase of $22,673,204. The imports advanced from $16,687,992 to $26,716,493, and the exports from $4,619,985 to $17,264,688. In the last few years there was a remarkable growth of exports. From $7,689,685 in 1896, the value of exported merchandise rose to $13,255,478 in 1897, and to $20,388,420 in 1898. The value for 1899, $17,264,688, although somewhat less than that for 1898, was larger than any previous record.

Annual statistics as to the value of the merchandise imported and exported by the United States in the trade with Japan during 1889–1899 are presented in the following table:

[1] The statistics given in the present bulletin are based upon the official returns of foreign trade published by the Bureau of Statistics, United States Treasury Department.

TRADE WITH CHINA.

In our commerce with China during 1889–1899 there was a gain of $13,293,168. The increase occurred almost entirely in the export trade, which advanced from $2,791,128 in 1889 to $14,493,440 in 1899. Our imports for 1899, amounting to $18,619,268, were only slightly larger than in 1889, when a value of $17,028,412 was reported. The exports to China, like those to Japan, showed an exceptional growth in 1897, 1898, and 1899, the records for these years being $11,924,433, $9,992,894, and $14,493,440, respectively.

Following is a statement of the imports and exports in our direct trade with China during each fiscal year from 1889 to 1899, inclusive:

Value of merchandise imported and exported by the United States in the trade with China during each fiscal year from 1889 to 1899, inclusive.

Years ended June 30—	Imports.			Exports.			Total imports and exports.	Excess of imports over exports.

TRADE WITH HONGKONG.

Our trade with the port of Hongkong, although less important than that credited directly to China, was nearly doubled during 1889–1899, making a gain of $5,045,149. The exports for 1899 had a value of $7,732,525 as compared with only $3,686,384 for 1889. The imports were considerably smaller and showed marked fluctuations. In 1889 they were valued at $1,480,266, but these figures were not equaled again until 1899, when a value of $2,479,274 was recorded.

The following statistics show the annual value of our import and export trade with Hongkong during the fiscal years 1889–1899:

Value of merchandise imported and exported by the United States in the trade with Hongkong during each fiscal year from 1889 to 1899, inclusive.

Years ended June 30—	Imports.			Exports.			Total imports and exports.	Excess of exports over imports.

GENERAL CHARACTER OF THE EXPORTS TO JAPAN, CHINA, AND HONGKONG.

Of the domestic merchandise shipped from the United States to Japan, China, and Hongkong during the fiscal year 1898[1] nearly 40 per cent consisted of agricultural products. In 1889, the first year of the decade, products of the farm constituted only about 25 per cent. Proportionately the agricultural exports have increased even more rapidly than the nonagricultural. In 1898 they attained a value of $14,356,614, as against $2,782,914 in 1889. This remarkable growth occurred chiefly during the four years 1895–1898. The value for 1894 was only $3,601,140.

[1] Returns showing the amount of the agricultural exports during the fiscal year 1899 are not yet available.

From these statistics it will be seen that the principal gain in agricultural exports occurred in the shipments to Japan, which advanced from $300,609 in 1889 to $8,969,816 in 1898. The sum quoted for the former year constituted only 6.5 per cent of the value of the total exports to Japan, while that for 1898 formed about 44 per cent.

Digitized by Google

The agricultural exports to China, although much smaller than those to Japan, likewise made a noticeable gain during the decade, the value for 1898 amounting to $695,549 as compared with only $108,757 for 1889. The part of our total shipments to China formed by products of the farm was inconsiderable, averaging less than 5 per cent for the ten years. During the latter half of the decade, however, the percentage of agricultural exports showed a material increase.

In the exports to Hongkong farm products comprised the principal part, forming about 65 per cent of the total in 1889, and increasing to 75 per cent in 1898. The value advanced from $2,373,548 in the former year to $4,691,249 in the latter.

LEADING EXPORTS.

Our exports to Japan, China, and Hongkong consist largely of five leading items—cotton, cotton manufactures, kerosene oil, wheat flour, and manufactures of iron and steel. In 1898 these five items formed nearly 80 per cent of the total exports to the three destinations mentioned, their combined value amounting to $28,859,635. Of this sum $14,923,371 represented the shipments to Japan, $8,889,374 those to China, and $5,046,890 those to Hongkong.

Following is a statement showing in tabular form the value of cotton, cotton manufactures, kerosene oil, wheat flour, and iron and steel manufactures exported from the United States to Japan, China, and Hongkong during the fiscal year 1898:

Value of cotton, cotton manufactures, kerosene oil, wheat flour, and iron and steel manufactures exported from the United States to Japan, China, and Hongkong during the fiscal year 1898.

COTTON.

Raw cotton was the most important of the five items mentioned. It went chiefly to Japan, our exports to that country in 1898 amounting to 112,106,823 pounds, with a value of $7,428,226. China took 5,650,856 pounds, worth $370,670, and Hongkong 900,000 pounds, worth $72,000. The total shipments to the three destinations during 1898 reached as high as 118,657,679 pounds, valued at $7,870,896. These figures represent the remarkable trade development of a single decade, for prior to 1889 there were no records of cotton exports to Japan, China, or

Digitized by Google

Hongkong. During that year 23,500 pounds, valued at $2,341, were sent to Japan, but no shipments to China were recorded until 1892, and none to Hongkong until 1898. The exports to Japan alone increased more than 100,000,000 pounds during the five years 1894–1898.

The following table shows the quantity and value of cotton exported from the United States to Japan, China, and Hongkong from 1889 to 1898, inclusive:

Quantity and value of raw cotton exported from the United States to Japan, China, and Hongkong during each fiscal year from 1889 to 1898, inclusive.

COTTON MANUFACTURES.

The exports of cotton manufactures were consigned largely to Chinese ports. The shipments to Japan and Hongkong in 1898 were valued at only $63,367 and $40,458, respectively, as compared with $5,203,427 for China. The total exports to the three destinations were worth $5,307,252.

Following is a statement showing our exports of cotton manufactures to Japan, China, and Hongkong during each of the ten years 1889–1898:

KEROSENE OIL.

After raw cotton, our chief article of export to Japan, China, and Hongkong is kerosene oil. During the ten years 1889–1898, the total shipments increased from 49,360,860 gallons to 111,582,814 gallons, and their value from $4,617,863 to $7,398,449. Of the exports for 1898, 51,621,050 gallons, worth $3,592,587, went to Japan; 44,324,344 gallons, worth $2,839,345, to China; and 15,637,420 gallons, worth $966,517, to Hongkong.

The quantity and value of kerosene oil shipped to these destinations during each of the ten years 1889–1898 will be seen from the following statistics:

Quantity and value of kerosene oil exported from the United States to Japan, China, and Hongkong during each fiscal year from 1889 to 1898, inclusive.

WHEAT FLOUR.

Our exports of wheat flour to each of the three destinations under consideration were greatly increased during the ten years. The consignments to Hongkong in 1898 amounted to 939,053 barrels, as against only 378,634 barrels in 1889, while the shipments to Japan during the same period rose from 19,677 barrels to 161,654 barrels, and the exports to China from 9,744 barrels to 19,609 barrels. The combined shipments show an increase from 408,055 barrels, valued at $1,746,622, in 1889, to 1,120,316 barrels, valued at $4,569,071, in 1898.

Following are annual statistics as to the quantity and value of wheat flour exported to Japan, China, and Hongkong from 1889 to 1898, inclusive:

IRON AND STEEL MANUFACTURES.

The various manufactures of iron and steel sent from the United States to Japan, China, and Hongkong in 1898 had a total value of $3,713,967 as compared with only $518,712 in 1889. The increase occurred chiefly during the three years 1896, 1897, and 1898. Japan was the principal market. Of the exports recorded for 1898 the consignments to Japan were valued at $3,195,152, those to China at $386,627, and those to Hongkong at $132,188.

The statistics given in the following table show the value of the iron and steel manufactures shipped from the United States to Japan, China, and Hongkong during each of the ten years 1889–1898:

Value of iron and steel manufactures exported from the United States to Japan, China, and Hongkong during each fiscal year from 1889 to 1898, inclusive.

AGRICULTURAL EXPORTS TO JAPAN.

As has already been pointed out, our shipments of agricultural produce to Japan during 1898 amounted in value to $8,969,816, form-

Digitized by Google

ing about 44 per cent of the total exports to that country. After cotton and wheat flour, the most important items, in the order of their value for 1898, were alcohol, leaf tobacco, milk, salted or pickled beef, wheat, canned beef, bones, butter, wine, and canned fruits.

The value of these and numerous other agricultural products exported from the United States to Japan during the five fiscal years 1894–1898 will be seen from the following statistics:

NONAGRICULTURAL EXPORTS TO JAPAN.

Next to kerosene oil and manufactures of iron and steel, the most important items among our nonagricultural exports to Japan in 1898 were unmanufactured iron and steel, paper and its manufactures, tobacco manufactures, leather, scientific and electric apparatus, lubricating oil, paraffin and paraffin wax, and watches.

The following table shows the annual value during 1894–1898 of the principal nonagricultural exports from the United States to Japan:

Value of the principal nonagricultural products exported from the United States to Japan during the five fiscal years 1894–1898.

AGRICULTURAL EXPORTS TO CHINA.

Of the $695,549 worth of merchandise comprising our agricultural exports to China in 1898, the principal items, after cotton and wheat flour, were ginseng, malt liquors, canned beef, milk, canned fruits, and leaf tobacco.

NONAGRICULTURAL EXPORTS TO CHINA.

Although cotton manufactures, kerosene oil, manufactures of iron and steel, and tobacco manufactures formed such a large part of our nonagricultural exports to China in 1898, there were numerous other items of considerable value, among the most important being lumber, unmanufactured iron and steel, paper and its manufactures, scientific and electric apparatus, vehicles, cycles, manufactures of wood, and lubricating oil.

The table following shows the value of our leading nonagricultural exports to China during the five fiscal years 1894–1898:

AGRICULTURAL EXPORTS TO HONGKONG.

After wheat flour, which is decidedly the leading factor in our export trade with Hongkong, ginseng formed the principal item among the agricultural products shipped to that port during 1898. The other agricultural exports of chief importance were cotton, canned fruits, malt liquors, canned beef, wheat, and cheese.

Statistics showing the annual value of the principal agricultural products shipped from the United States to Hongkong during 1894–1898 are presented in the following table:

NONAGRICULTURAL EXPORTS TO HONGKONG.

Among the nonagricultural exports to Hongkong in 1898, kerosene oil was by far the most important article. The items that came next in value were fish and fish products, and manufactures of iron and steel. Other items of considerable importance were tobacco manufactures, cotton manufactures, lubricating oil, perfumery and cosmetics, lumber, and manufactures of wood.

The value of our nonagricultural exports to Hongkong from 1894 to 1898, inclusive, is shown by the following statistics:

GAINS IN OUR EXPORTS TO JAPAN, CHINA, AND HONGKONG.

It is within the last five years that the most striking gains have occurred in our exports to Japan, China, and Hongkong. From 1894 to 1898 the value of the domestic merchandise sent from the United States to these three destinations showed an increase of $22,532,373, or more than 150 per cent. The items that contributed most to this increase were cotton, cotton manufactures, iron and steel manufactures, wheat flour, and kerosene oil. The exports of raw cotton rose from $360,492 in 1894 to $7,870,896 in 1898, and the exports of cotton manufactures during the same period from $2,921,236 to $5,307,252, the gain for these two items alone amounting to nearly $10,000,000. In the exports of iron and steel manufactures there was an increase from $407,579 to $3,713,967. The shipments of wheat flour advanced from $2,098,240 to $4,569,071, and the shipments of kerosene oil from $5,664,531 to $7,398,449.

PRINCIPAL GAINS IN OUR EXPORTS TO JAPAN.

A comparison of our domestic exports to Japan alone in 1894 and 1898 shows a gain of $16,373,312, most of which occurred in the items of cotton, iron and steel manufactures, crude iron and steel, and kerosene oil. Exports of cotton from the United States to Japan were first recorded in 1889, the shipments for that year having a value of $2,341. The trade grew with great rapidity, the value of the exports increasing to $360,492 in 1894 and to $7,428,226 in 1898. The gain during the last five years amounted to $7,067,734. In the value of the iron and steel manufactures exported there was an advance from $218,711 in 1894 to $3,195,152 in 1898, an increase of $2,976,441. Of unmanufactured iron and steel no exports were recorded for 1894. In 1895 there was an item of $3,335, but in 1898 the shipments under this head had increased to $1,793,284. The exports of kerosene oil showed a gain of $1,383,517 during the five years, advancing from $2,209,070 to $3,592,587.

After the four items mentioned, the most important gains in our exports to Japan from 1894 to 1898 were the following: Paper and its manufactures, $488,687; wheat flour, $432,460; alcohol, $316,787; tobacco manufactures, $303,332; leather, $234,323; lubricating oil, $205,359; leaf tobacco, $196,216; scientific and electric instruments and apparatus, $195,597; and watches, $109,496.

PRINCIPAL GAINS IN OUR EXPORTS TO CHINA.

The increase in our domestic exports to China during 1894–1898 amounted to $4,133,582. More than half of this gain occurred in the shipments of cotton manufactures, which showed an increase of $2,349,206, the value for 1898 amounting to $5,203,427, as compared with only $2,854,221 for 1894. Although small exports of raw cotton to China were recorded in 1892, none were reported in 1893, 1894, and 1895, and the first exportation of any considerable importance was that for 1898, amounting in value to $370,670. In the shipments of kerosene oil, which formed the most important item after cotton manufactures, there was an advance from $2,435,794 to $2,839,345, making a gain of $403,551. Other leading examples of increase for 1894–1898 were: Iron and steel manufactures, $321,931; tobacco manufactures, $210,365; and lumber, $113,136.

The important gains made in our exports to China during 1898, as compared with 1894, will be seen from the table following:

PRINCIPAL GAINS IN OUR EXPORTS TO HONGKONG.

Our domestic exports to Hongkong in 1898 showed a gain of $2,025,479 as compared with 1894. The increase was due chiefly to larger shipments of wheat flour, the exports of this article advancing from $1,809,319 in 1894 to $3,835,727 in 1898. Kerosene oil, which was the second item in value, exhibited a slight falling off, but the losses in this and several other commodities were more than offset by the gains reported. The increase in wheat flour alone amounted to $2,026,408. The first recorded exports of raw cotton to Hongkong occurred during 1898, the value being $72,000. These shipments were probably destined to China. The exports of ginseng showed a gain of $63,154, increasing from $538,339 to $601,493. Among the other instances of increase during 1894–1898 were: Cotton manufactures, $23,914; lubricating oil, $20,929; malt liquors, $20,841; and wheat, $10,415.

The statistics given in the following table show the principal gains made in our export trade with Hongkong during 1894–1898:

GENERAL CHARACTER OF THE IMPORTS FROM JAPAN. CHINA, AND HONGKONG.

About four-fifths of the merchandise imported into the United States from Japan, China, and Hongkong during the ten years 1889–1898 consisted of products of agriculture. In 1898 our agricultural imports from these sources were valued at $38,843,236 and our nonagricultural imports at $7,453,327.

The following statement of values permits a comparison of our agricultural and nonagricultural imports from Japan, China, and Hongkong for each of the ten fiscal years 1889–1898:

Combined imports of merchandise into the United States from Japan, China, and Hongkong during each fiscal year from 1889 to 1898, inclusive, classified as agricultural and nonagricultural.

1897	34,068,324	75.14	11,269,136	45,337,460
1898	38,843,236	83.90	7,453,327	46,296,563
Annual average, 1894–1898	34,857,613	78.13	9,759,490	44,617,103

Agricultural products naturally form a larger portion of the imports from China than of those from Japan. In 1898 nonagricultural commodities comprised less than 10 per cent of our imports from the former country, and slightly more than 20 per cent of our imports from the latter. Of our imports from Hongkong in 1898 over 40 per cent consisted of nonagricultural articles.

Following is a statement showing the annual value of the agricultural and the nonagricultural imports from each of the three sources mentioned in the fiscal years 1889 to 1898, inclusive:

LEADING IMPORTS.

Silk and tea form the principal part of the imports received in our trade with Japan, China, and Hongkong. During the fiscal year 1898 these two items amounted in value to about 70 per cent of the total importations from the sources mentioned. The silk imports for that year were valued at $23,959,935, and the tea imports at $8,896,836. Silk comes in largest quantities from Japan, while tea is received most extensively from China. The small consignments of these products recorded as from Hongkong are undoubtedly reshipments of goods coming originally from Japan and China.

IMPORTS FROM JAPAN.

Our imports of raw silk from Japan in 1898 were valued at $16,453,406, and our imports of silk manufactures at $2,068,668. Tea was imported to the value of $3,045,079. Straw matting formed an item of considerable importance, the value amounting to $903,747. Other leading imports from Japan during 1898, with their values, were: Rice, $399,652; earthen, stone, and china ware, $313,712; camphor, $286,191; hat materials, $207,820; paper and its manufactures, $199,556; fans, $151,822; sulphur, $146,813; vegetable-fiber manufactures, $136,153; wood manufactures, $104,005; and brushes, $101,256.

IMPORTS FROM CHINA.

From China raw silk was imported in 1898 to the value of $7,506,409. The imports of silk manufactures were comparatively small, amounting to only $135,906. The value of the Chinese tea imported reached as high as $5,827,177. After silk and tea, the largest imports were wool, and hides and skins, the former item having a value of $1,564,803 and the latter one of $1,210,788. Other items of considerable importance among our imports from China, with their values for 1898, were the following: Opium, $650,644; hat materials, $632,065; rice, $557,163; straw matting, $350,379; furs, and manufactures of, $206,953; spices, $187,027; sugar, $176,751; firecrackers, $141,132; bristles, $122,244; silk waste, $106,144; and vegetable oils, $100,129.

IMPORTS FROM HONGKONG.

Among the commodities imported from Hongkong during 1898 straw matting and sugar were the leading items. The imports of straw matting were valued at $163,713, and the sugar imports at $107,295. It is probable that the matting came chiefly from China, while the sugar was presumably of Philippine origin. It is also apparent that a large part of the remaining imports from Hongkong should be credited to other sources, that port being primarily a point of reshipment. After matting and sugar, the most important imports in 1898, with their

Digitized by Google

values, were as follows: Vegetable oils, $77,476; rice, $58,095; spices, $48,689; Manila hemp, $31,459; vegetable-fiber manufactures, $25,082; tea, $24,580; firecrackers, $19,816; camphor, $17,827; coffee, $13,841; and silk manufactures, $12,383.

The annual value of our principal imports from Hongkong during 1894–1898 is shown by the following statistics:

Value of the principal articles imported into the United States from Hongkong during the five fiscal years 1894–1898.

TABLES SHOWING IN DETAIL OUR TRADE WITH JAPAN, CHINA, AND HONGKONG.

Following are complete statements, by articles, of the merchandise imported and exported by the United States in the trade carried on with Japan, with China, and with Hongkong, respectively, during each fiscal year from 1889 to 1898, inclusive. The agricultural and the non-agricultural imports and exports in the commerce with each of the three countries are separately collated, and the statistics presented are so arranged as to cover the two quinquennial periods 1889–1893 and 1894–1898, respectively, each five-year table being accompanied by a statement of the annual averages for the period to which it relates. The tables are as follows:

LETTER OF TRANSMITTAL.

U. S. DEPARTMENT OF AGRICULTURE,
SECTION OF FOREIGN MARKETS,
Washington, D. C., April 30, 1900.

SIR: I have the honor to transmit herewith a statistical review of our foreign trade in agricultural products during the ten fiscal years 1890–1899, and to recommend its publication as Bulletin No. 19 of this Office.

Very respectfully,

FRANK H. HITCHCOCK, *Chief.*

Hon. JAMES WILSON,
Secretary of Agriculture.

OUR FOREIGN TRADE IN AGRICULTURAL PRODUCTS, 1890-1899.

TRADE OF 1899.

In the fiscal year 1899, for the fourth time during the history of our foreign commerce, the annual value of domestic merchandise exported by the United States exceeded a billion dollars. The first record of the kind was made in 1892, when the declared valuation amounted to $1,015,732,011. Immediately following 1892 there were four years, 1893–1896, during which our exports were considerably smaller. After that, in 1897, a marked increase occurred, resulting in a value of $1,032,007,603, the highest up to that time. During 1898 a still further growth took place, and the unprecedented value of $1,210,291,913 was attained. Then came 1899, with a record of $1,203,931,222. This value, while somewhat less than the exceptionally high figures of 1898, was far in excess of any previously reported.

The total imports for 1899 were valued at $697,148,489. Although much below the average for the last ten years, these figures exhibit a marked gain over the 1898 value, which was unusually small, amounting to only $616,049,654. The annual average for the decade 1890–1899 was above $750,000,000.

A comparison of the imports with the domestic exports shows that in 1899 the excess on the side of the latter reached as high as $506,782,733.

AGRICULTURAL IMPORTS.

The products of foreign agriculture purchased by the United States during 1899 had a value of $355,514,881, constituting 51 per cent of the total imports of merchandise. Notwithstanding an increase of $41,223,085 over the low figures recorded for 1898, the agricultural imports of 1899 were decidedly smaller than the average for the past decade, which amounted to about $387,000,000.

AGRICULTURAL EXPORTS.

Of the domestic merchandise marketed abroad in 1899, 65.85 per cent, with a total value of $792,811,733, consisted of the products of agriculture. While the value for 1899 was $66,207,213 less than the exceptionally high figures of 1898, it exceeded all prior records, except

Digitized by Google

that for 1892, a year that was notable because of the remarkably abundant crops in America accompanying a general deficiency abroad. Conditions somewhat similar to those recounted for 1892 prevailed, but to a less marked extent, during 1898, resulting in an unusually heavy exportation of breadstuffs. Under the more normal conditions of 1899 our breadstuff exports were considerably smaller. In the latter year the value of the breadstuffs shipped to foreign countries amounted to only $273,999,699 as against $333,897,119 in 1898, a decline of $59,897,420. This falling off in the exportation of breadstuffs, together with a loss of $20,863,643 in the value of the cotton shipments, more than accounted for the total decrease in agricultural exports.

Compared with the agricultural imports of the same year, the agricultural exports for 1899 show an excess of $437,296,852.

SUMMARY STATEMENT OF IMPORTS AND EXPORTS.

The extent to which the imports and exports of the United States consisted of products of agriculture, and the excess of agricultural exports over agricultural imports, during each fiscal year from 1890 to 1899, inclusive, will be seen from the official[1] statistics presented in the following summary statement:

Value of imports and domestic exports of the United States, total and agricultural, and excess of agricultural exports over agricultural imports, during each fiscal year from 1890 to 1899, inclusive.

Years ended June 30—	Imports.			Domestic exports.			Excess of agricultural exports over agricultural imports.
	Total.	Agricultural.	Per cent agricultural.	Total.	Agricultural.	Per cent agricultural.	
1890	$789,310,409	$384,100,435	48.66	$845,293,828	$634,855,869	75.10	$250,755,434

LEADING AGRICULTURAL IMPORTS.

The leading agricultural imports of the United States during the fiscal year 1899, named in the order of their importance, were sugar,

[1] The statistics of importation and exportation given in the present bulletin are based on the official returns of trade published annually by the Bureau of Statistics, United States Treasury Department.

Digitized by Google

coffee, hides and skins, silk, vegetable fibers, fruits and nuts, tobacco, tea, wool, wines, cocoa, and vegetable oils. Measured in value, these twelve items constituted over 85 per cent of the total agricultural import trade for the year mentioned.

SUGAR.

Of sugar the United States imported in 1899 3,980,250,569 pounds, or 1,290,329,718 pounds more than the unusually small imports of the year before, which amounted to only 2,689,920,851 pounds. In the value of the imports there was an advance during the two years from $60,472,749 to $94,964,120, making a gain of $34,491,371. The average import price per pound was 2.2 cents for 1898 and 2.4 cents for 1899.

COFFEE.

In the imports of coffee there was a decline of 38,687,392 pounds during 1899, the receipts for that year amounting to only 831,827,063 pounds as against 870,514,455 pounds for 1898. Meanwhile the value fell from $65,067,631 to $55,275,470, showing a loss of $9,792,161. In 1898 the import price averaged 7.5 cents per pound, but in 1899 it dropped to 6.6 cents.

HIDES AND SKINS.

The imports of hides and skins increased from 245,774,616 pounds, worth $37,068,932, during 1898 to 267,090,750 pounds, worth $41,988,043, during 1899. There was a gain of 21,316,134 pounds in quantity and $4,919,111 in value. The import price per pound averaged 15.1 cents for 1898 and 15.7 cents for 1899. Goatskins and hides of cattle were the chief items under hides and skins.

Goatskins.—Our imports of goatskins for 1899 amounted to 69,728,945 pounds, worth $18,488,326, as compared with 64,923,487 pounds, worth $15,776,601, for the previous year. The quantity was increased by 4,805,458 pounds and the value by $2,711,725. In the average import price per pound there was an advance during the two years from 24.3 cents to 26.5 cents.

Hides of cattle.—The quantity of cattle hides imported during 1899 was 4,152,425 pounds in excess of the 1898 record, but owing to a decline from 10.8 cents to 10.4 cents per pound in the average annual import price the total value of the imports showed a falling off of $3,043. In 1898 126,243,595 pounds, valued at $13,624,989, were imported, and in 1899 130,396,020 pounds, valued at $13,621,946.

SILK.

Of silk, 837,568 pounds less were received in 1899 than in 1898, the imports falling during the two years from 12,087,951 pounds to 11,250,383 pounds. The value on the other hand, owing to higher

Digitized by Google

prices, showed an increase of $369,561, advancing from $32,110,066 in 1898 to $32,479,627 in 1899. An average import price of $2.89 per pound was reached in the latter year as compared with only $2.66 for the former.

VEGETABLE FIBERS.

The vegetable fibers imported during 1899 amounted in value to $25,313,239, or $6,847,550 in excess of the figures for 1898, which were recorded at $18,465,689. Sisal grass, Manila hemp, and cotton were the principal items.

Sisal grass.—Of sisal grass, 71,898 tons, worth $9,211,377, were imported during 1899, an increase of 2,576 tons in quantity and $4,041,477 in value over the imports for 1898, which amounted to 69,322 tons, worth $5,169,900. The import price per ton rose during the two years from $74.58 to $128.12.

Manila hemp.—The imports of Manila hemp for 1899 amounted to 53,195 tons, having a value of $6,211,475. During 1898 50,270 tons, with a value of only $3,239,341, were imported. These figures show gains of 2,925 tons in quantity and $2,972,134 in value. In the average annual import price there was an advance from $64.44 to $116.77 per ton.

Cotton.—Cotton was imported to the extent of 52,660,363 pounds during 1898 and 50,158,158 pounds during 1899, a decrease of 2,502,205 pounds. In the value of the imports there was a decline from $5,019,503 to $5,013,146, making a loss of $6,357. The import price per pound averaged 9.5 cents for 1898 and 10 cents for 1899. The imports consisted largely of Egyptian cotton.

FRUITS AND NUTS.

In the importation of fruits and nuts there was a considerable increase during 1899, the value recorded for that year amounting to $18,314,206, as compared with $14,566,950 for 1898. This was a gain of $3,747,256. Fruits were the chief factor, having an import value of $12,329,012 in 1898 and $15,586,664 in 1899. Bananas and lemons formed the leading items.

Bananas.—The imports of bananas for 1899 amounted in value to $5,665,588, or $1,429,170 in excess of the 1898 figures, which were recorded at $4,236,418.

Lemons.—In the case of lemons, the value of the imports advanced from $2,848,130 during 1898 to $4,398,004 during 1899, showing an increase of $1,549,874.

TOBACCO.

Our imports of unmanufactured tobacco increased from 10,477,108 pounds, worth $7,488,608, in 1898 to 14,035,829 pounds, worth

Digitized by Google

$9,900,253, in 1899. The gain in quantity amounted to 3,558,721 pounds, and that in value to $2,411,645. There was a decline from 71.5 cents to 70.5 cents per pound in the average annual import price.

TEA.

The tea imports for 1899 amounted to 74,089,899 pounds, having a value of $9,675,081, while in 1898 71,957,715 pounds, valued at $10,054,283, were imported. In quantity there was a gain of 2,132,184 pounds, and in value a loss of $379,202. The import price per pound averaged 14 cents for 1898 and 13.1 cents for 1899.

WOOL.

In the importation of wool there was a marked falling off during 1899, the receipts for that year amounting to only 76,736,209 pounds, valued at $8,322,897, as against 132,795,202 pounds, valued at $16,783,692, for 1898. These figures represent a decline of 56,058,993 pounds in quantity and $8,460,795 in value. During 1898 the import price per pound averaged 12.6 cents, but in 1899 it fell to 10.8 cents.

WINES.

Wines were imported in 1899 to the value of $6,590,206. This was an increase of $621,026 over the 1898 value, which was recorded at $5,969,180.

COCOA, OR CACAO.

Our imports of cocoa increased from 26,533,228 pounds, worth $3,782,877, during 1898 to 36,438,583 pounds, worth $5,360,116, during 1899. The gain in quantity amounted to 9,905,355 pounds, and that in value to $1,577,239. The average import price per pound was 14.3 cents for 1898 and 14.7 cents for 1899.

VEGETABLE OILS.

Vegetable oils were imported in 1899 to the value of $5,300,664. As compared with the imports for 1898, which were valued at $4,869,091, this was an increase of $431,573.

TABLE OF LEADING AGRICULTURAL IMPORTS.

In the subjoined table are enumerated in the order of their importance such of the agricultural imports for 1899 as had a valuation exceeding $1,000,000, together with statistics exhibiting the quantity and value of each and the amount of increase or decrease for that year, as compared with 1898. There are 29 articles in the list given, and of these 20, measured in value, show an increase for 1899, while 9 show a decrease. The table is as follows:

LEADING AGRICULTURAL EXPORTS.

After breadstuffs, cotton, and meat products, which always form by far the most important items in our agricultural export trade, the principal exports for the fiscal year 1899, in the order of their value, were live animals, tobacco, oil cake and oil-cake meal, vegetable oils, fruits and nuts, dairy products, and seeds. These ten leading items comprised in value over 95 per cent of the total exports of agricultural produce during 1899. Breadstuffs, cotton, and meat products constituted alone more than 80 per cent.

Following is a table that shows the value of each of the ten items under consideration in 1898 and 1899, with the amount of increase or decrease for 1899:

Digitized by Google

Agricultural exports (domestic) of the United States for 1898 and 1899, arranged by leading groups, with amount of increase or decrease in 1899.

Agricultural exports.	Years ended June 30—		Increase in 1899.	Decrease in 1899.

BREADSTUFFS.

When contrasted with the average of earlier years, the value of the breadstuffs exported in 1899, amounting to $273,999,699, appears unusually high. The exports for 1898, however, reached the enormous value of $333,897,119, exceeding all previous records, and in comparison with these figures the 1899 returns show a decline of $59,897,420.

Wheat was the principal factor in this decline, although in the case of wheat flour there was a considerable increase. Indian corn, oats, rye, and barley exhibited a marked falling off.

Wheat.—Of wheat, 139,432,815 bushels were exported in 1899, the value amounting to $104,269,169. Although much larger than the average, the 1899 shipments were 8,798,446 bushels short of the exceptionally heavy exports recorded for the preceding year. In 1898 there was an exportation of 148,231,261 bushels, having a value of $145,684,659. The export price per bushel, which averaged as high as 98.3 cents for 1898, declined in 1899 to 74.8 cents, and this fact accounts in part for the falling off of $41,415,490 in the total value of the exports.

Wheat flour.—The quantity of wheat flour sent to foreign markets during 1899 was 18,485,690 barrels, or 3,135,747 barrels more than the exports of 1898, which amounted to 15,349,943 barrels. Notwithstanding a decline from $4.51 to $3.95 per barrel in the average annual export price, the total value of the shipments advanced from $69,263,718 in 1898 to $73,093,870 in 1899, a gain of $3,830,152.

Converted into its equivalent in grain, the flour exported in 1898 was equal to 69,074,744 bushels of wheat, and that in 1899 to 83,185,605 bushels. The combined shipments of wheat and wheat flour, therefore, amounted to 217,306,005 bushels for the former year and to 222,618,420 bushels for the latter, showing an increase of 5,312,415 bushels during 1899. The combined value of the wheat and wheat flour exports came to $214,948,377 in 1898 and to $177,363,039 in 1899.

Digitized by Google

Indian corn.—In the exportation of Indian corn there was a falling off during 1899 of 34,655,845 bushels, the shipments for that year amounting to only 174,089,094 bushels as compared with 208,744,939 bushels for 1898. The decline in value was less marked, owing to an advance from 35.5 cents to 39.6 cents per bushel in the average annual export price. At these prices the shipments during 1898 and 1899 were worth $74,196,850 and $68,977,448, respectively, the decrease in the latter year amounting to $5,219,402.

Oats.—The decline that occurred during 1899 in the exportation of oats was particularly marked, amounting to more than 50 per cent. The shipments for 1899 were recorded at only 30,309,778 bushels, worth $9,787,540, as against 69,130,288 bushels, worth $20,632,914, for 1898. There was a falling off of 38,820,510 bushels in quantity and $10,845,374 in value. The average annual export price rose in the two years from 29.8 cents to 32.3 cents per bushel.

Rye.—Of rye 10,140,866 bushels were exported in 1899, or 5,400,709 bushels less than in the preceding year, when the shipments amounted to 15,541,575 bushels. The value for 1899 was $5,936,078 as compared with $8,825,769 for 1898, a falling off of $2,889,691. In the export price per bushel a slight increase occurred, the annual average rising from 56.8 cents in 1898 to 58.5 cents in 1899.

Barley.—The exports of barley for 1899 amounted to only 2,267,403 bushels, worth $1,375,274, as contrasted with 11,237,077 bushels, worth $5,542,040, for the year before. The decline in quantity was 8,969,674 bushels, and that in value $4,166,766. The annual export price per bushel averaged as high as 60.7 cents for 1899, while in 1898 it was only 49.3 cents.

COTTON.

The exports of cotton for 1899 were recorded at 3,787,719,122 pounds, worth $210,089,576, as against 3,862,785,869 pounds, worth $230,953,219, for 1898. The falling off shown by these figures was a decided one, amounting to 75,066,747 pounds in quantity and $20,863,643 in value. Owing to a decline from 6 cents to 5.5 cents per pound in the average annual export price, the decrease in value was more marked than that in quantity.

MEAT PRODUCTS.

In the exportation of meat products there was a considerable increase during 1899, the value of the shipments for that year amounting to $166,679,166, or $9,552,624 in excess of the record for 1898, which was $157,126,542. The largest gains occurred in the case of hog products and especially pork and lard. The total value of the hog products exported advanced from $110,801,151 in 1898 to $115,179,343 in 1899, an increase of $4,378,192. In beef products there was a gain of $2,181,230, the value rising during the two years from $31,906,384 to

Digitized by Google

$34,087,614. Oleo-oil was another meat product that showed a considerable increase. In the shipments of bacon there was a noticeable falling off.

Bacon.—Our bacon exports, which in 1898 amounted to 650,108,933 pounds, worth $46,380,918, fell during 1899 to 562,651,480 pounds, worth $41,557,067. This was a decline of 87,457,453 pounds in quantity and $4,823,851 in value. The annual export price per pound averaged 7.1 cents for 1898 and 7.4 cents for 1899.

Hams.—American hams were marketed abroad in 1899 to the extent of 225,846,750 pounds, an increase of 25,660,889 pounds over the 1898 shipments, which were recorded at 200,185,861 pounds. The value of the exports rose during the two years from $18,987,525 to $20,774,084, a gain of $1,786,559. In the average annual export price there was a decline from 9.5 cents for 1898 to 9.2 cents for 1899.

Pork, salted or pickled.—The exports of salted or pickled pork increased from 88,133,078 pounds, worth $4,906,961, during 1898 to 137,197,200 pounds, worth $7,917,066, during 1899. In quantity there was gain of 49,064,122 pounds, and in value one of $3,010,105. The annual export price per pound, which averaged 5.6 cents for 1898, rose to 5.8 cents in 1899.

Lard.—Lard was also exported more extensively in 1899 than in 1898. The 1899 shipments amounted to 711,259,851 pounds, valued at $42,208,465, as compared with 709,344,045 pounds, valued at $39,710,672, for the year before. The quantity was increased by 1,915,806 pounds and the value by $2,497,793. There was an advance in the average annual export price from 5.6 cents to 5.9 cents per pound.

Fresh beef.—In the exportation of fresh beef, which formed the principal item among the beef products, there was an increase of 7,371,900 pounds during 1899, the shipments for that year amounting to 282,139,974 pounds as against 274,768,074 pounds for 1898. Meanwhile the value of the exports advanced from $22,966,556 to $23,545,185, a gain of $578,629. The annual export price per pound averaged 8.4 cents for 1898 and 8.3 cents for 1899.

Oleo-oil.—During 1899 the exports of oleo-oil reached as high as 142,390,492 pounds, with a value of $9,183,659. The quantity was greater by 9,811,215 pounds and the value higher by $1,279,246 than in 1898, when 132,579,277 pounds, worth $7,904,413, were exported. In the average annual export price there was an advance in the two years from 6 cents to 6.4 cents per pound.

LIVE ANIMALS.

The shipments of live animals in 1899 were considerably smaller than in 1898, the total value of the 1899 consignments amounting to only $37,880,916 as against $46,243,406 for the year before, a decrease

Digitized by Google

of $8,362,490. Cattle were the leading factor in this decline. There was also a noticeable falling off in the exportation of horses.

Cattle.—In the number of cattle sent abroad there was a decrease of 49,765 during 1899, the record for that year being 389,490, as compared with 439,255 for 1898. The total value of the cattle shipped fell from $37,827,500 in the earlier year to $30,516,833 in the later, showing a loss of $7,310,667. The export price per head averaged only $78.35 for 1899, while in 1898 it was $86.12.

Horses.—The number of horses exported in 1899 was 45,778, or 5,372 less than in the previous year, which had a record of 51,150. In value there was a decline during the two years from $6,176,569 to $5,444,342, the difference amounting to $732,227. The average export price per head fell from $120.75 in 1898 to $118.93 in 1899.

TOBACCO.

Our exports of tobacco in its unmanufactured forms during 1899 were valued at $25,467,218, an increase of $3,295,638 over the 1898 value, which amounted to $22,171,580. These figures include stems and trimmings as well as leaf tobacco, although the latter was the principal item.

Leaf tobacco.—Of leaf tobacco we shipped to foreign countries in 1899 272,421,295 pounds, or 20,162,393 pounds more than in 1898, when there was an export record of 252,258,902 pounds. Meanwhile the total value of the shipments increased from $21,924,337 to $25,170,771, a gain of $3,246,434. In the average yearly export price per pound there was an advance from 8.7 cents in 1898 to 9.2 cents in 1899.

OIL CAKE AND OIL-CAKE MEAL.

The exports of oil cake and oil-cake meal during 1899 were the largest ever recorded, amounting to 1,569,093,133 pounds, or 210,956,431 pounds in excess of the heavy shipments of the year before, when 1,358,136,702 pounds were sent abroad. The value for 1899 reached as high as $14,548,765, showing a gain of $1,946,945 over the figures for 1898, which were returned at $12,601,820. In both years the export price averaged 0.9 cent per pound.

VEGETABLE OILS.

A new record was also made in the exportation of vegetable oils. The shipments for 1899 were valued at $13,809,335, or $1,790,266 above the 1898 value, which was the highest previously reported, amounting to $12,019,069. Cotton-seed oil formed the chief item.

Cotton-seed oil.—Of cotton-seed oil 50,627,219 gallons, worth $12,077,519, were sent abroad in 1899, making the largest exports on record. There was an increase of 10,396,435 gallons in quantity and

Digitized by Google

$1,939,900 in value over the exports of the year preceding, which amounted to 40,230,784 gallons, worth $10,137,619. The average export price per gallon showed a decline from 25.2 cents in 1898 to 23.9 cents in 1899.

FRUITS AND NUTS.

In the exportation of fruits and nuts there was a decrease during 1899. The value for that year amounted to only $7,897,485, as against $9,013,310 for 1898, a falling off of $1,115,825. Fruits formed the principal part of the shipments, having a value of $8,851,878 in 1898 and $7,757,235 in 1899.

DAIRY PRODUCTS.

There was also a noticeable falling off during 1899 in the exportation of dairy products. The year before, products of the dairy worth $9,095,759 were marketed abroad, but in 1899 the value of the shipments fell to $7,629,211, a decline of $1,466,548. Cheese and butter both contributed to this decline.

Cheese.—The exports of cheese for 1899 amounted to only 38,198,753 pounds, worth $3,316,049, as compared with 53,167,280 pounds, worth $4,559,324, for the previous year. There was a decrease of 14,968,527 pounds in quantity and $1,243,275 in value. The average export price per pound was 8.6 cents for 1898 and 8.7 cents for 1899.

Butter.—In the shipments of butter there was a falling off from 25,690,025 pounds, valued at $3,864,765, during 1898 to 20,247,997 pounds, valued at $3,263,951, during 1899. The decline in quantity amounted to 5,442,028 pounds and that in value to $600,814. The average export price rose in the two years from 15 cents to 16.1 cents per pound.

SEEDS.

The value of the seed exports of 1899 amounted to $5,079,396, showing a gain of $2,124,673 over the figures for 1898, which were recorded at $2,954,723. The increase was due chiefly to larger shipments of flaxseed. In the exportation of grass seed there was a slight falling off.

TABLE OF LEADING AGRICULTURAL EXPORTS.

The table printed below enumerates in the order of their importance such of the agricultural exports for 1899 as had a valuation exceeding $1,000,000, and gives the quantity and value exported in that year and the year before, together with the amount of increase or decrease. Of the 41 articles covered by the table, 26 show larger exports for 1899 than for 1898 and 15 show smaller. The table is as follows:

AGRICULTURAL IMPORTS AND EXPORTS CLASSIFIED AS ANIMAL MATTER AND VEGETABLE MATTER.

As a convenient basis of classification the various articles comprising our agricultural imports and exports may be grouped under two general heads, animal matter and vegetable matter.

AGRICULTURAL IMPORTS.

The relative standing of these two categories in our agricultural imports during each fiscal year from 1890 to 1899, inclusive, is shown by the following statement:

Digitized by Google

Agricultural imports of the United States during the fiscal years 1890 to 1899, inclusive, classified as animal matter and vegetable matter.

Years ended June 30—	Agricultural imports.				
	Total.	Animal matter.		Vegetable matter.	
		Values.	Per cent of total.	Values.	Per cent of total.
1890	$384,100,435	$81,041,275	21.10	$303,059,160	78.90
1891	420,211,949	82,845,612	19.72	337,366,337	80.28
1892	436,697,057	86,193,605	19.74	350,503,452	80.26
1893	425,657,448	95,301,166	22.39	330,356,282	77.61
1894	365,160,319	48,928,085	13.40	316,232,234	86.60
Annual average, 1890-1894	406,365,441	78,861,948	19.41	327,503,493	80.59
1895	373,115,985	87,054,990	23.33	286,060,995	76.67
1896	391,029,407	104,118,490	26.63	286,910,917	73.37
1897	400,871,468	114,586,188	28.58	286,285,280	71.42
1898	314,291,796	100,633,008	32.02	213,658,788	67.98
1899	355,514,881	97,825,938	27.52	257,688,943	72.48
Annual average, 1895-1899	366,964,708	100,843,723	27.48	266,120,985	72.52

AGRICULTURAL EXPORTS.

Under a similar classification our agricultural exports for the same years show the following relation:

Agricultural exports of the United States during the fiscal years 1890 to 1899, inclusive, classified as animal matter and vegetable matter.

Years ended June 30—	Agricultural exports (domestic).				
	Total.	Animal matter.		Vegetable matter.	
		Values.	Per cent of total.	Values.	Per cent of total.
1890	$634,855,869	$176,136,315	27.74	$458,719,554	72.26
1891	652,407,931	178,309,251	27.33	474,098,680	72.67
1892	803,122,045	182,026,147	22.66	621,095,898	77.34
1893	621,201,671	171,428,673	27.60	449,772,998	72.40
1894	636,633,747	189,526,548	29.77	447,107,199	70.23
Annual average, 1890-1894	669,644,253	179,485,387	26.80	490,158,866	73.20

AGRICULTURAL IMPORTS AND EXPORTS FOR 1890-1899, IN DETAIL.

A detailed statement of the agricultural imports[1] and exports of the United States during each fiscal year from 1890 to 1899, inclusive, embracing all such commodities as may reasonably be classed in the agricultural category, is presented in the following tables:

[1] In comparing the yearly import returns for 1890-1899 tariff changes should be taken into account. The tariff law of 1883 was in force until October 6, 1890. At that date the tariff of 1890 became law, remaining in effect until August 27, 1894, when it was superseded by the tariff law of 1894. The latter law continued in force until July 24, 1897, at which date the present tariff became operative.

LETTER OF TRANSMITTAL.

U. S. DEPARTMENT OF AGRICULTURE,
SECTION OF FOREIGN MARKETS,
Washington, D. C., June 25, 1900.

SIR: I have the honor to transmit herewith a statistical report showing the value of the various agricultural products exported from the United States to each country of destination during the five fiscal years 1895–1899, and to recommend its publication as Bulletin No. 20 of this Office.

Very respectfully,

FRANK H. HITCHCOCK,
Chief.

Hon. JAMES WILSON,
Secretary of Agriculture.

AGRICULTURAL EXPORTS OF THE UNITED STATES, BY COUNTRIES, 1895–1899.

INTRODUCTION.

The present bulletin comprises a series of statistical tables designed to show at a glance the extent and character of the agricultural export trade carried on by the United States with the several foreign countries. Following the general summaries that appear on the first few pages of the report will be found a separate table for every country of destination, the principal agricultural exports to each destination being arranged in the order of their average annual value for the five fiscal years 1895–1899. The statistical statements presented are in every instance based on the official returns[1] of exportation.

PRINCIPAL FOREIGN MARKETS FOR AMERICAN FARM PRODUCTS.

During the period covered by the five fiscal years 1895–1899 the United States exported nearly three and a half billion dollars' worth of domestic agricultural produce. The average annual value reached $694,874,000.

Of these exports about 88 per cent went to European countries. Our leading market, the United Kingdom, received 53.4 per cent, or nearly four times the amount sent to Germany, which ranked next in importance. Germany's share was 13.6 per cent. France took 6.2 per cent, or less than half as much as Germany. The Netherlands received 4.7 per cent, Belgium 3.8 per cent, Italy 2.3 per cent, Spain 1.3 per cent, and Denmark 1.1 per cent.

The largest market outside of Europe was afforded by Canada, that country taking 3.6 per cent. Important sales were also made to Cuba, Brazil, Japan, British Africa, British West Indies, Mexico, and Hongkong.

The only other countries to which the United States sent agricultural exports during 1895–1899 having an average annual value in excess of $1,000,000 were Sweden and Norway, European Russia, Austria-Hungary, Portugal, British Australasia, Haiti, Venezuela, Hawaiian Islands, British Guiana, Porto Rico, and the French West Indies.

---

[1] The statistics given in the present bulletin are all based on the official export returns published by the Bureau of Statistics, Treasury Department, in its annual reports on the Commerce and Navigation of the United States.

SUMMARY STATEMENT, BY COUNTRIES, OF TOTAL AGRICULTURAL EXPORTS.

Following is a summary table exhibiting the total value of the agricultural exports from the United States to each country of destination during the five fiscal years 1895–1899:

Value of the agricultural products exported from the United States to the several foreign countries during each fiscal year from 1895 to 1899, inclusive.

CHARACTER OF AGRICULTURAL EXPORTS TO LEADING MARKETS.

UNITED KINGDOM.

To the United Kingdom we sell more farm produce than to all other countries combined. During 1895–1899 the average annual value of our agricultural exports to the British market amounted to $370,862,028. Breadstuffs and meat products to help feed the teeming population of the Kingdom and raw cotton to supply the English mills formed the bulk of the trade. The yearly shipments of breadstuffs averaged $112,183,000 in value, cotton $104,008,000, and meat products $86,196,000.

Wheat and wheat flour were the chief items among the breadstuffs. Their combined value averaged over $80,000,000. The shipments of wheat in the grain amounted to $46,507,000 and those of wheat flour to $34,597,000. Indian corn also ranked high among the breadstuffs, having a value of $21,378,000. Oats were shipped to the value of $4,456,000 and barley to the value of $2,182,000.

Of the meat products bacon was decidedly the most important, the average annual shipments amounting in value to $29,914,000. Next to bacon came fresh beef, with a value of $20,948,000. The exports of canned beef were worth only $2,821,000 and those of salted or pickled beef only $1,593,000. Hams were shipped to the value of

Digitized by Google

$12,651,000. Of salted or pickled pork there were shipments worth $1,432,000. The lard exports were recorded at $12,796,000, ranking third in importance among the meat products. Tallow formed an item of $1,012,000.

In addition to the meat products, there were average annual exports of live stock worth $36,199,000, consisting largely of cattle for slaughter. There was also an exportation of dairy products worth $5,128,000 a year. The total trade in live stock, meat products, and dairy products exceeded $125,000,000 in annual value.

After breadstuffs, cotton, meat products, and live animals, our most important agricultural export to the British market during 1895–1899 was tobacco. The shipments of this product had an average yearly value of $8,416,000.

Oil cake and oil-cake meal formed an item of $3,348,000 and fruits and nuts one of $3,081,000. Seeds were shipped to the value of $1,337,000 and vegetable oils to the value of $1,062,000. Glucose and grape sugar, worth $2,712,000, and hops worth $2,018,000, were also items of importance.

GERMANY.

Our agricultural exports to Germany during 1895–1899 had an average annual value of $94,470,608. More than half of this amount was paid for cotton, of which product there were shipments averaging as much as $47,618,000 a year in value. The annual exportation of meat products came to $17,152,000, and that of breadstuffs was nearly as large, amounting to $16,915,000.

Lard formed the principal item under meat products, having an average yearly value of $10,109,000. Bacon came next, with a value of $1,803,000. There were annual shipments of hams worth $535,000, canned beef $450,000, salted or pickled beef $337,000, and salted or pickled pork $327,000. Oleo oil was exported to the value of $1,683,000. Sausage casings formed an item of $669,000 and tallow one of $376,000.

Indian corn was the principal cereal sent to the German market, the average annual exports having a value of $8,941,000. Wheat formed an item of $2,984,000 and wheat flour one of $969,000. There were exports of rye worth $1,540,000.

The shipments of United States tobacco to Germany during 1895–1899 had an average value of $4,187,000 a year.

Oil cake and oil-cake meal formed another export of considerable importance, the value averaging $2,988,000.

FRANCE.

To France we sold during 1895–1899 farm produce having an average yearly value of $43,223,704. As in the case of our agricultural

Digitized by Google

exports to Germany, cotton formed over 50 per cent of the trade, our consignments of this product to French ports showing an average value of $22,832,000 a year.

Breadstuffs constituted an item of $10,237,000. Of this amount $7,091,000 was paid for wheat. Indian corn was purchased to the extent of $2,018,000 and oats to the extent of $867,000.

Our shipments of meat products to France were comparatively small, amounting to only $3,224,000. Lard formed about one-half of the item, having a value of $1,761,000. Bacon was shipped to the value of $445,000, but the other meats went in much smaller amounts. There were exports of tallow worth $409,000.

Cotton-seed oil has become one of the leading items among our agricultural exports to France, where it is being used in increasing quantities as a substitute for olive oil. The average annual value of the shipments for 1895–1899 was $2,479,000.

Our exports of tobacco to France in the period mentioned averaged $2,198,000 a year.

NETHERLANDS.

The products of agriculture shipped from the United States to the Netherlands during 1895–1899 amounted in average annual value to $32,864,156. Breadstuffs formed an item of $15,212,000 and meat products one of $10,526,000.

The breadstuffs sent to Dutch ports consisted chiefly of wheat, wheat flour, and Indian corn. Of wheat there were annual exports averaging $5,015,000 in value, wheat flour $3,307,000, and Indian corn $4,687,000. Oats were shipped to the value of $820,000 and rye to the value of $593,000.

Oleo oil was the principal item under meat products, having an average yearly value of $4,746,000. This product is extensively used in the Netherlands for the manufacture of oleomargarin.

Lard formed another item of importance under this head, the value averaging $3,230,000. Bacon was exported to the extent of $799,000, salted or pickled pork $259,000, hams $212,000, canned beef $159,000, and salted or pickled beef $109,000. Sausage casings worth $471,000 and tallow worth $256,000 were also among the exports recorded.

The average yearly shipments of United States tobacco to the Netherlands amounted in value to $1,305,000.

Other leading exports to the Netherlands were: Cotton-seed oil, $1,693,000; oil cake and oil-cake meal, $1,349,000; and cotton, $1,056,000.

BELGIUM.

Our exports of farm produce to Belgium during 1895–1899, had an average annual value of $26,092,565. Breadstuffs brought $10,656,000 of this amount, meat products $6,176,000, and cotton $3,902,000.

Digitized by Google

Wheat was the leading item under breadstuffs, amounting in value to $6,140,000. Of Indian corn there were exports worth $1,965,000. Oats were shipped to the value of $1,075,000, rye $454,000, barley $418,000, and wheat flour $308,000.

Under the head of meat products, the principal items were bacon, lard, and hams. The exports of bacon were valued at $2,216,000, lard $2,060,000, and hams $1,114,000.

Tobacco was shipped to Belgium in considerable quantities, the average annual value amounting to $1,941,000.

Another item of importance in our agricultural export trade with that country was oil cake and oil-cake meal, of which there were shipments valued at $1,299,000.

CANADA.

Next to our five leading European customers—the United Kingdom, Germany, France, Netherlands, and Belgium—Canada furnished the largest market for our agricultural exports during 1895–1899, the average yearly value of the produce sent to that country amounting to $24,970,999.

Breadstuffs formed nearly one-half of the trade, the value of this item averaging $11,687,000 a year. Exports of Indian corn worth $4,173,000, of wheat worth $4,049,000, and of wheat flour worth $2,790,000 were recorded. Other breadstuffs were shipped much less extensively.

After breadstuffs, the most important agricultural export to Canada was cotton, the shipments of this product having an average yearly value of $3,293,000.

Our exports of meat products to Canada were comparatively small, the value amounting to only $2,372,000. Bacon to the value of $652,000, salted or pickled pork $574,000, hams $373,000, and lard $313,000 formed the chief items.

Among the numerous other agricultural products sent to Canada the most important, with their values, were: Tobacco, $1,123,000; cheese, $809,000; hides and skins, $777,000; horses, $685,000; and cattle, $385,000.

ITALY.

Italy ranks seventh among the foreign markets for American farm produce. During 1895–1899 our agricultural exports to that country had an average annual value of $15,723,095. Cotton was the important factor in the trade, the shipments of this product amounting in average yearly value to $11,080,000. After cotton, the largest item was tobacco, of which product there were exports worth $2,741,000. The only other articles averaging above $100,000 were: Cotton-seed oil, $450,000; wheat, $371,000; Indian corn, $315,000; bacon, $237,000; and lard, $163,000.

Digitized by Google

SPAIN.

To Spain we sent agricultural exports during 1895–1899 having an average value of $8,961,911 a year. As in the case of Italy, cotton comprised the principal part of the trade. In average annual value the cotton shipments amounted to $8,012,000. Tobacco valued at $706,000, wheat $122,000, Indian corn $69,000, sausage casings $24,000, and lard oil $12,000 were the only other items of importance.

DENMARK.

Denmark afforded us a market during 1895–1899 for agricultural products having an average annual value of $7,722,490. More than half of this sum was paid for Indian corn, which was decidedly the most important of the exports, averaging in value $3,923,000 a year. Another feed stuff, oil cake and oil-cake meal, formed the second item in importance, having a value of $848,000. Cotton was third, with a value of $700,000. Other leading items were: Wheat, $504,000; lard, $469,000; rye, $215,000; oleo oil, $202,000; wheat flour, $175,000; and butter, $142,000.

CUBA.

Cuba was tenth in importance among the destinations to which our agricultural exports went during 1895–1899. The average annual value of the farm products shipped to the island in that period was $6,287,156. Lard, wheat flour, cattle, bacon, and hams were the five leading articles in the trade. The lard exports averaged in value $1,503,000, wheat flour $1,083,000, cattle $579,000, bacon $533,000, and hams $413,000. Among other items the most important were: Beans and peas, $286,000; potatoes, $278,000; Indian corn, $253,000; eggs, $192,000; mules, $139,000; milk, $131,000; and bottled malt liquors, $112,000.

BRAZIL.

Our agricultural exports to Brazil during 1895–1899 had an average yearly value of $6,164,974. Wheat flour was by far the most important item, averaging $3,263,000 a year in value. After flour came bacon, with a value of $1,084,000. Lard ranked third, the value being $995,000. There were shipments of wheat worth $222,000, and of cotton-seed oil worth $201,000. Butter to the value of $83,000 was the only other item exceeding $50,000.

JAPAN.

To Japan we sent during 1895–1899 exports of agricultural produce averaging $5,177,118 a year. Cotton formed a large part of the trade, the average annual shipments of this product amounting in value to $3,569,000. Next to cotton, wheat flour was the most important export,

Digitized by Google

the value being $544,000. Tobacco, with a value of $537,000, was third. Alcohol was exported to the value of $147,000. Other items of some importance were canned beef, worth $95,000, and milk, worth $58,000.

BRITISH AFRICA.

British Africa was the destination during 1895–1899 of agricultural exports from the United States having an average annual value of $5,140,039. The exports consisted largely of breadstuffs. Wheat was the leading item, the average yearly value being $1,680,000. Of wheat flour there were shipments worth $747,000. Indian corn was exported to the value of $423,000, and corn meal to the value of $105,000. Rum was one of the principal articles shipped, the value amounting to $952,000. Canned beef was also an important item, having a value of $293,000. Other leading exports, with their values were: Tobacco, $146,000; lard oil, $97,000; lard, $94,000; and mules, $73,000.

BRITISH WEST INDIES.

The agricultural produce sent from this country to the British West Indies during 1895–1899 amounted in average annual value to $5,112,696. Wheat flour was the most important export, the value averaging $2,016,000 a year. Next to wheat flour the principal item was salted or pickled pork, of which product there were shipments worth $507,000. Bread and biscuit formed an item of $320,000. After these leading exports came shipments of Indian corn worth $243,000, corn meal worth $220,000, salted or pickled beef worth $201,000, and lard worth $166,000. Among other items the most important were: Oil cake and oil-cake meal, $138,000; oleomargarin, $138,000; tobacco, $121,000; and butter, $120,000.

MEXICO.

To Mexico we shipped during 1895–1899 agricultural products having an average yearly value of $4,679,085. Cotton was decidedly the leading article, averaging $1,520,000 in annual value. Indian corn came next with a value of $824,000. Then followed in their order cotton-seed oil to the value of $377,000, lard $204,000, tobacco $141,000, wheat flour $132,000, hogs $132,000, and wool $123,000. Other exports of considerable importance were: Wines (unbottled), $88,000; malt liquors (bottled), $76,000; horses, $74,000; malt, $68,000; cattle, $56,000; grease, $52,000; and tallow, $51,000.

HONGKONG.

Agricultural exports to the average annual value of $4,145,108 were sent from the United States to Hongkong during 1895–1899. The principal item in the trade was wheat flour, the shipments of that product averaging in yearly value $3,125,000. Next to wheat flour

Digitized by Google

the most important export was ginseng, the value amounting to $739,000. Bottled malt liquors formed an item of $81,000, canned fruits $30,000, and canned beef $22,000.

SWEDEN AND NORWAY.

The average annual value of our agricultural exports to Sweden and Norway during 1895–1899 was $3,702,369. Cotton, bacon, oleo oil, lard, rye, wheat flour, and wheat were the products shipped most extensively. The cotton shipments had an average yearly value of $824,000. Bacon was exported to the value of $627,000, oleo oil to the value of $404,000, and lard to the value of $350,000. The consignments of rye were worth $268,000, wheat flour $265,000, and wheat $264,000. Of the remaining items, the most important were: Salted or pickled pork, $82,000; Indian corn, $79,000; tobacco, $76,000; salted or pickled beef, $75,000; and molasses and sirup, $59,000.

EUROPEAN RUSSIA.

European Russia was the destination during 1895–1899 of American farm produce amounting in average annual value to $3,626,283. Cotton formed the principal part of the trade, the exports of this product averaging as high as $3,418,000 in yearly value. After cotton the most important items were wheat flour, Indian corn, and bacon. The shipments of wheat flour averaged $66,000, Indian corn $43,000, and bacon $40,000.

AUSTRIA-HUNGARY.

To Austria-Hungary we consigned during 1895–1899 agricultural products worth, on the average, $2,556,048 a year. Cotton, cotton-seed oil, lard, and wheat were the leading articles. The average annual value of the cotton shipped was $963,000, and that of the cotton-seed oil $746,000. The lard exports amounted to $403,000, and the wheat exports to $155,000. The only other items of much importance were tallow to the value of $84,000 and bacon to the value of $76,000.

PORTUGAL.

Our agricultural exports to Portugal during 1895–1899 had an average yearly value of $2,457,562. Wheat was the principal item, the annual shipments of this grain averaging $1,778,000 in value. Next to wheat, cotton and Indian corn were the leading products sent to Portugal. The exports of cotton were valued at $439,000 a year, and the exports of Indian corn at $180,000. There were no other items averaging above $50,000.

BRITISH AUSTRALASIA.

British Australasia afforded a market for our agricultural produce during 1895–1899 to the average annual value of $2,243,282. Wheat,

Digitized by Google

wheat flour, tobacco, and canned fruits were the leading articles. The exports of wheat averaged in value $582,000 a year, and those of wheat flour $443,000. Tobacco was shipped to the value of $305,000, and canned fruits to the value of $175,000. Among the other exports the most important were: Sausage casings, $77,000; barley, $68,000; hops, $65,000; and glucose and grape sugar, $62,000.

HAITI.

To Haiti we exported during 1895-1899 farm produce having an average value of $1,945,404 a year. The items of chief importance were wheat flour, salted or pickled pork, and lard. The average annual value of the wheat flour exported was $655,000, that of the salted or pickled pork $586,000, and that of the lard $191,000. Other leading items were: Tobacco, $97,000; butter, $85,000; tallow, $61,000; salted or pickled beef, $60,000; and refined sugar, $59,000.

VENEZUELA.

The agricultural products shipped from the United States to Venezuela during 1895-1899 amounted in average annual value to $1,498,-349. Wheat flour and lard were the principal articles, the former averaging $712,000 a year in value, and the latter $437,000 a year. Of the remaining exports, butter to the value of $80,000, and hams to the value of $62,000, were the most important.

HAWAIIAN ISLANDS.

Our exports of farm produce to the Hawaiian Islands during 1895–1899 had an average yearly value of $1,459,182. The leading item was wheat flour, of which product there were shipments averaging in value $260,000 a year. Barley was also shipped quite extensively, the value being $189,000. Bran, middlings, and mill feed formed an item of $139,000, and hay one of $102,000. Among the other exports, those of highest value were: Wines (unbottled), $75,000; malt liquors (bottled), $53,000; and mules, $50,000.

BRITISH GUIANA.

To British Guiana we shipped during 1895–1899 products of agriculture worth on the average $1,253,905 a year. Wheat flour, salted or pickled pork, and salted or pickled beef formed a large part of the trade. The exports of wheat flour amounted in average annual value to $633,000. Salted or pickled pork was shipped to the value of $191,000, and salted or pickled beef to the value of $106,000. The item of next importance was tobacco, of which there were exports worth $44,000.

PORTO RICO.

Porto Rico afforded us a market for agricultural produce during 1895–1899 amounting in average yearly value to $1,191,632. The principal items were wheat flour, lard, and salted or pickled pork. Of wheat flour there were shipments amounting in average value to $466,000 a year. The exports of lard averaged $233,000, and those of salted or pickled pork $193,000. Among the other items the most important were: Hams, $61,000; beans and peas, $43,000; bottled malt liquors, $40,000; bacon, $38,000; and bread and biscuit, $27,000.

FRENCH WEST INDIES.

The only other foreign market to which we exported during 1895–1899 farm products having an average annual value in excess of $1,000,000 was that afforded by the French West Indies. To this destination we sent agricultural exports averaging $1,082,338 a year. Wheat flour was decidedly the most important item, having an average yearly value of $482,000. After wheat flour the principal export was cotton-seed oil, the value being $93,000. Chief among the remaining items were: Oleomargarin, $78,000; lard, $69,000; and salted or pickled pork, $56,000.

AGRICULTURAL EXPORTS, BY CONTINENTS.

The following table shows the value of our agricultural exports to the several continents during 1895–1899:

Value of the agricultural products exported from the United States to the several continents during each fiscal year from 1895 to 1899, inclusive.

Continents to which exported.	Years ended June 30—					Annual average, 1895–1899.	
	1895.	1896.	1897.	1898.	1899.

NORTH AMERICA.

The neighboring countries and islands of North America took about 7 per cent of our agricultural exports for 1895–1899, the value averaging $50,229,587.

In the following table the distribution of our exports of farm produce to North American destinations during 1895–1899 is shown in detail:

Value of the agricultural products exported from the United States to the countries of North America during each fiscal year from 1895 to 1899, inclusive.

SOUTH AMERICA.

To South America we sent during 1895–1899, 1.6 per cent of our total shipments of farm produce. The average yearly value amounted to $11,043,940.

Following is a detailed statement, by countries, of the agricultural exports to South America during 1895–1899:

Value of the agricultural products exported from the United States to the countries of South America during each fiscal year from 1895 to 1899, inclusive.

ASIA.

Our agricultural exports to Asia during 1895–1899 were nearly as large as those to South America, the shipments to the former continent having an average annual value of $10,249,463, and forming 1.5 per cent of the total.

Digitized by Google

The distribution of our agricultural exports to Asiatic countries in the period mentioned will be seen from the following table:

AGRICULTURAL EXPORTS, BY PRINCIPAL GROUPS.

On the basis of their average annual value for 1895–1899 the ten principal items in our agricultural export trade rank in the following order: Cotton, breadstuffs, meat products, live animals, tobacco, oil cake and oil-cake meal, vegetable oils, dairy products, fruits and nuts, and seeds.

The following table shows the relative value of these several groups of exports during 1895–1899:

Value of the agricultural exports of the United States, by leading groups, during each fiscal year from 1895 to 1899, inclusive.

Agricultural exports.	Years ended June 30—					Annual average, 1895–1899.

BREADSTUFFS.

Our exports of breadstuffs during 1895–1899 had an average yearly value of $212,343,162, almost equaling the cotton shipments in importance. Over one-half of the breadstuffs exported during the period mentioned found a market in the United Kingdom, the consignments to that country forming 53 per cent of the total. Germany and the Netherlands furnished the markets of next importance, the former country taking 8 per cent and the latter 7.2 per cent. To Canada we shipped 5.5 per cent, to Belgium 5 per cent, to France 4.8 per cent,

Digitized by Google

and to Denmark 2.3 per cent. Brazil was credited with 1.7 per cent, British Africa with 1.5 per cent, Hongkong with 1.5 per cent, and the British West Indies with 1.4 per cent.

The following table shows in full the distribution of our exports of breadstuffs during 1895–1899:

Value of breadstuffs exported from the United States, by countries of destination, during each fiscal year from 1895 to 1899, inclusive.

MEAT PRODUCTS.

The meat products sent abroad during 1895–1899 amounted in average annual value to $141,501,091. Of these exports the United Kingdom took 61 per cent, far exceeding all other countries in the extent of its requirements. After the United Kingdom, Germany was our most important market, purchasing 12 per cent of the total shipments. The Netherlands received 7.4 per cent, Belgium 4.4 per cent, and France 2.3 per cent. To Cuba we shipped 1.9 per cent, to Canada 1.7 per cent, to Brazil 1.5 per cent, and to Sweden and Norway 1.2 per cent.

Detailed statistics as to the foreign distribution of our meat products during 1895–1899 are given in the following table:

Value of meat products exported from the United States, by countries of destination, during each fiscal year from 1895 to 1899, inclusive.

Countries to which exported.	Years ended June 30— 1895.	1896.	1897.	1898.	1899.	Annual average, 1895–1899.

TOBACCO.

Of tobacco we sent abroad during 1895–1899 annual shipments amounting in average value to $24,544,115. The United Kingdom, Germany, and Italy were the three principal markets. Our consignments to the United Kingdom formed 34 per cent of the total, those to Germany 17 per cent, and those to Italy 11 per cent. France was credited with 9 per cent, Belgium with 7.9 per cent, the Netherlands with 5.3 per cent, and Canada with 4.6 per cent. To Spain we shipped 2.9 per cent, to Japan 2.2 per cent, and to British Australasia 1.2 per cent.

The following table shows the distribution, by countries, of our tobacco exports for 1895–1899:

Value of tobacco exported from the United States, by countries of destination, during each fiscal year from 1895 to 1899, inclusive.

OIL CAKE AND OIL-CAKE MEAL.

Our exports of oil cake and oil-cake meal during 1895–1899 had an average annual value of $10,375,373. These products were marketed chiefly in the United Kingdom, Germany, the Netherlands, Belgium, and Denmark. The United Kingdom took 32 per cent of the total, Germany 29 per cent, the Netherlands 13 per cent, Belgium 13 per cent, and Denmark 8.2 per cent. To France we sent 3.4 per cent, and to the British West Indies 1.3 per cent.

Following is a table showing, by countries, the exports of oil cake and oil-cake meal during 1895–1899:

Value of oil cake and oil-cake meal exported from the United States, by countries of destination, during each fiscal year from 1895 to 1899, inclusive.

VEGETABLE OILS.

Vegetable oils were marketed abroad during 1895–1899 to the average yearly value of $9,555,831. France took the largest share, the shipments to that country forming 26 per cent of the total. The Netherlands afforded the second market in importance, taking 19 per cent. The United Kingdom stood third with 11 per cent, Germany fourth with 10 per cent, and Austria-Hungary fifth with 7.8 per cent. To Italy we exported 5 per cent, to Belgium 4.8 per cent, to Mexico 4.2 per cent, to Brazil 2.1 per cent, to Canada 1.8 per cent, and to French Africa 1.5 per cent.

The distribution of the vegetable oils exported during 1895–1899 is shown in detail by the following table:

Value of vegetable oils exported from the United States, by countries of destination, during each fiscal year from 1895 to 1899, inclusive.

DAIRY PRODUCTS.

The dairy products exported from the United States during 1895-1899 had an average annual value of $7,862,358. Nearly two-thirds of our total shipments went to the United Kingdom, that country being credited with 65 per cent. Next to the United Kingdom, Canada was our most important market, taking 14 per cent. To the British West Indies we shipped 2.6 per cent, to Cuba, 2.4 per cent, and to Germany, 2 per cent. Denmark took 1.8 per cent, Haiti 1.2 per cent, Brazil 1.1 per cent, Venezuela 1.1 per cent, and Japan 1 per cent.

FRUITS AND NUTS.

Our exports of fruits and nuts during 1895–1899 amounted in average yearly value to $7,060,191. The United Kingdom, Canada, and Germany afforded the principal markets. To the United Kingdom we shipped 44 per cent of the total, to Canada 14 per cent, and to Germany 13 per cent. The remaining exports went chiefly to the Netherlands, France, Belgium, and British Australasia. The Netherlands took 7.7 per cent, France 5.7 per cent, Belgium 4.4 per cent, and British Australasia 3.5 per cent.

The following table gives the distribution by countries of our exports of fruits and nuts for 1895–1899:

Value of fruits and nuts exported from the United States, by countries of destination, during each fiscal year from 1895 to 1899, inclusive.

SEEDS.

Seeds were exported during 1895–1899 to the average annual value of $3,700,743. The shipments were marketed chiefly in the United Kingdom, Canada, Germany, and the Netherlands. The United Kingdom took 36 per cent of the total, Canada 20 per cent, Germany 18 per cent, and the Netherlands 14 per cent. To Belgium we sent 5.9 per cent, to France 1.5 per cent, to British Australasia 1.3 per cent, and to Denmark 1.1 per cent.

AGRICULTURAL EXPORTS, BY COUNTRIES.

On the following pages will be found a series of tables showing in some detail the character and value of our agricultural export trade during 1895–1899 with the several foreign countries. The exports to each country have been compiled in a separate table, the articles[1] being arranged in the order of their average annual value for the five years. An alphabetical index to the countries covered by the tables is printed on pages 87–88. The tables are as follows:

Value of the agricultural exports of the United States, by countries of destination, during each fiscal year from 1895 to 1899, inclusive.

AUSTRIA-HUNGARY.

AGRICULTURAL IMPORTS OF THE UNITED STATES, BY COUNTRIES, 1895–1899.

INTRODUCTION.

The statistical tables that form the subject-matter of the present bulletin have been compiled for the purpose of exhibiting, in small compass, the value and character of our agricultural imports from each of the various foreign countries. The statistics cover the five fiscal years 1895–1899, and are in every instance based on the official returns[1] of importation. In form and arrangement the tables are similar to the corresponding statements of exportation printed in Bulletin No. 20,[2] which the present report is intended to supplement.

PRINCIPAL SOURCES OF THE AGRICULTURAL IMPORTS.

Of the agricultural imports of the United States during 1895–1899, amounting in average annual value to $366,964,708, more than one-half came from tropical countries. Brazil, the leading source of our coffee supply, ranked foremost among the countries that sold us products of agriculture, furnishing 15 per cent of our total imports. From the United Kingdom we received 9.3 per cent, but our imports from that country consisted to a considerable extent of produce from other sources that was distributed through the British market. The island of Cuba, which contributes so largely to our sugar requirements, stood third among the sources of the agricultural imports, supplying 7.5 per cent. From Germany we received 6.6 per cent, that country ranking fourth in the trade. As in the case of the United Kingdom, however, an important part of the produce bought from Germany came originally from other countries. Japan was the fifth country in importance, supplying 4.9 per cent. China followed closely with a record of 4.8 per cent. From France we purchased 4.7 per cent, and from Italy 4.2 per cent. The Dutch East Indies furnished 4 per cent, the Hawaiian Islands 3.7 per cent, Mexico 3.7 per cent, Canada 2.8 per cent, the British West Indies 2.8 per cent, the British East Indies 2.7 per cent, the Netherlands 2.4 per cent, Venezuela 2.3 per cent,

[1] The statistics given in the present bulletin are all based on the official import returns published by the Bureau of Statistics, Treasury Department, in its annual reports on the Commerce and Navigation of the United States.

[2] Bulletin No. 20, "Agricultural Exports of the United States, by Countries, 1895–1899."

Digitized by Google

and Argentina 2.1 per cent. The only other sources from which we received agricultural imports during 1895–1899 exceeding 1 per cent of the total were: Egypt, 1.7 per cent; the Philippine Islands, 1.2 per per cent; and Colombia, 1.1 per cent.

SUMMARY STATEMENT, BY COUNTRIES, OF TOTAL AGRICULTURAL IMPORTS.

In the following summary table statistics are presented showing the total value of the agricultural imports of the United States from each country of shipment during the five fiscal years 1895–1899:

Value of the agricultural products imported into the United States from the several countries of shipment during each fiscal year from 1895 to 1899, inclusive.

Countries from which imported.	Years ended June 30—					Annual average, 1895–1899.

CHARACTER OF AGRICULTURAL IMPORTS FROM LEADING SOURCES.

BRAZIL.

Brazil supplies about two-thirds of the coffee consumed in the United States, but aside from this one article our agricultural imports from that country are small. The total value of the products of agriculture received from Brazil during 1895–1899 averaged $54,116,397 a year, and of this sum $48,700,000 was paid for coffee. After coffee the most important articles were sugar, and hides and skins. The sugar imports amounted in average annual value to $2,349,000, and the imports of hides and skins to $2,270,000. Other items of some importance were: Cocoa, $364,000; fruits and nuts, $212,000; hair, $101,000; and crude feathers and downs, $57,000.

UNITED KINGDOM.

From the United Kingdom we imported during 1895–1899 agricultural produce amounting in average annual value to $34,131,835. Wool was the most important article, averaging $12,975,000 a year in value. Hides and skins formed the second item in importance, the value being $4,981,000. Imports of vegetable fibers were received to

Digitized by Google

the value of $3,377,000. Under the head of vegetable fibers the leading articles were cotton, Manila hemp, and flax. Of cotton there were imports worth $1,361,000. They consisted chiefly of Egyptian cotton. Manila hemp was imported to the value of $856,000, and flax to the value of $733,000. Of crude feathers and downs there were imports valued at $1,261,000. Vegetable oils formed an item of $991,000. Sugar was imported to the value of $954,000. Of fruits and nuts there were imports worth $948,000. Among numerous other agricultural imports, leading items were: Bottled malt liquors, $892,000; tea, $696,000; coffee, $608,000; and linseed, $607,000.

CUBA.

Our agricultural imports from Cuba during 1895–1899 had an average annual value of $27,407,798. Of this sum $20,485,000 was paid for sugar. Next to sugar the principal item was tobacco, of which there were imports worth $5,608,000. Fruits and nuts were purchased to the value of $571,000. Bananas were the leading variety, the imports of this fruit amounting in value to $393,000. Of hides and skins there were imports worth $273,000. Another product imported quite extensively from Cuba was molasses, the value being $269,000.

GERMANY.

Germany sold us agricultural products during 1895–1899 to the average yearly value of $24,092,378. Sugar was decidedly the most important item, averaging in value $13,264,000 a year. After sugar, our principal imports from Germany were hides and skins, and wines. Hides and skins formed an item of $1,980,000, and wines one of $1,196,000. Rice was imported through the German markets to the value of $637,000, and rice flour, rice meal, and broken rice to the value of $850,000, the purchases of rice in all forms aggregating $1,487,000. Of the remaining imports, the most important were: Bristles, $624,000; coffee, $568,000; hops, $565,000; tobacco, $392,000; vegetable oils, $333,000; hair, $297,000; and unbottled malt liquors, $241,000.

JAPAN.

From Japan there were agricultural imports during 1895–1899 amounting in average annual value to $18,109,810. Silk was the principal factor in the trade, our importations of this product averaging in value $12,975,000 a year. Tea and rice were the only other items of much importance. The tea imports were valued at $4,445,000 and the rice imports at $584,000. Of the remaining items the largest were nursery stock, $26,000, and vegetable oils, $24,000.

CHINA.

Our agricultural imports from China during 1895–1899, amounting in average yearly value to $17,717,797, consisted largely of tea and silk. Tea formed an item of $6,483,000 and silk one of $6,270,000. Wools were imported quite extensively from China, the value being $1,514,000. Other items of considerable importance were: Hides and skins, $887,000; prepared opium, $848,000; rice, $499,000; sugar, $475,000; coffee, $121,000; and vegetable oils, $102,000.

FRANCE.

France sold us agricultural products during 1895–1899 having an average annual value of $17,375,950. Wines, hides and skins, wools, silk, and fruits and nuts were the leading articles. We imported French wines to the average yearly value of $4,209,000, champagne worth $3,307,000 being the principal item. The imports of hides and skins averaged $2,460,000, wools $2,046,000, silk $1,477,000, and fruits and nuts $1,091,000. Vegetable oils were imported to the value of $932,000, the chief item under this head being olive oil, worth $464,000. Argols, or wine lees, formed an item of $697,000, and brandy one of $620,000. Among the other agricultural imports from France were: Sugar, $457,000; crude feathers and downs, $323,000; grease, $221,000; and glue, $220,000.

ITALY.

From Italy we purchased products of agriculture during 1895–1899 to the average yearly value of $15,235,145. The principal articles were silk, and fruits and nuts. The silk imports averaged $5,542,000 in annual value and the imports of fruits and nuts $5,287,000. Lemons formed the chief item under the head of fruits, the value being $3,892,000. Oranges were imported to the value of $761,000. Under nuts the leading item was almonds, of which there were imports worth $184,000. Argols, or wine lees, were imported quite extensively from Italy, the value amounting to $1,086,000. Of vegetable oils there were imports valued at $938,000, olive oil worth $518,000 being the principal item. Other imports were: Hemp, $466,000; cheese, $456,000; grease, $155,000; and hides and skins, $155,000.

DUTCH EAST INDIES.

The Dutch East Indies supplied us during 1895–1899 with agricultural produce the average annual value of which was $14,592,466. Of this sum $12,261,000 was paid for sugar, that product forming the principal part of the trade. The only other item of much importance was coffee, of which there were yearly purchases averaging $2,141,000. Among the remaining imports the largest were: Hides and skins, $40,000; nutmegs, $35,000; and pepper, $19,000.

Digitized by Google

HAWAIIAN ISLANDS.

Our agricultural imports from the Hawaiian Islands during 1895–1899 had an average yearly value of $13,617,189. They consisted chiefly of sugar, of which product average annual purchases to the value of $13,172,000 were recorded. Rice was the second item in importance, having a value of $190,000. Hides and skins were imported to the value of $82,000, and fruits and nuts to the value of $78,000. Bananas formed the chief item under fruits and nuts, the value being $66,000. Coffee valued at $71,000 and wool valued at $11,000 were about the only other agricultural imports worth mentioning.

MEXICO.

From Mexico we imported products of agriculture during 1895–1899 to the average annual value of $13,600,110. Vegetable fibers, coffee, hides and skins, and cattle were the principal articles. Of vegetable fibers there were imports averaging $5,301,000 a year in value. Sisal grass was the leading item under this head, the value being $4,778,000. Istle, or Tampico fiber, was imported to the value of $385,000. The imports of coffee were valued at $4,178,000, hides and skins $1,671,000, and cattle $1,237,000. Vanilla beans formed an item of considerable importance, amounting in value to $512,000. Of the remaining imports the largest were fruits and nuts, $195,000, and tobacco, $154,000. Oranges were the leading fruit imported, the value amounting to $158,000.

CANADA.

Numerous farm products were imported from Canada, but mostly in limited quantities, the total value for 1895–1899 averaging $10,149,241 a year. Live stock formed the largest item, amounting in average annual value to $2,176,000. There were imports of sheep worth $939,000, cattle worth $749,000, and horses worth $442,000. Next to live stock, wheat was the leading import, having a value of $1,355,000. Then came hides and skins, valued at $1,236,000, and hay, valued at $1,077,000. Wool was imported to the value of $829,000. Among various other items were the following: Tobacco, $495,000; fruits and nuts, $411,000; beans and peas, $397,000; barley, $330,000; flax, $232,000; and potatoes, $154,000.

BRITISH WEST INDIES.

The British West Indies sent us during 1895–1899 agricultural products that amounted in average yearly value to $10,078,849. Sugar, fruits and nuts, cocoa, and coffee were the leading imports. The purchases of sugar averaged $5,037,000 a year. Fruits and nuts were bought to the value of $2,695,000, the principal items being bananas

Digitized by Google

worth $1,757,000, oranges worth $532,000, and cocoanuts worth $160,000. The imports of cocoa amounted in value to $1,316,000, and those of coffee to $545,000. Among other items the most important were molasses, $67,000, and sisal grass, $41,000.

BRITISH EAST INDIES.

From the British East Indies we imported agricultural products in 1895–1899 having an average annual value of $9,996,048. Chief among these imports were hides and skins, vegetable fibers, indigo, and vegetable oils. The imports of hides and skins averaged $3,047,000 a year in value. Vegetable fibers were imported to the value of $2,062,000, jute and jute butts worth $2,020,000 forming the principal item. Of indigo there were imports valued at $1,388,000. The vegetable oils imported were worth $973,000. Other items of some importance were: Coffee, $591,000; pepper, $505,000; linseed, $266,000; nutmegs, $216,000; tea, $213,000; and sugar, $201,000.

NETHERLANDS.

Our agricultural imports from the Netherlands during 1895–1899 had an average yearly value of $8,731,858. More than half of this sum was paid for tobacco, chiefly Sumatra. Our imports of this product from Dutch ports averaged $4,782,000 a year in value. The next largest import was sugar, the value being $906,000. Coffee was purchased to the value of $614,000. Other leading items were: Cocoa, $397,000; hides and skins, $311,000; vegetable oils, $308,000; and nursery stock, $290,000.

VENEZUELA.

Venezuela shipped to us during 1895–1899 products of agriculture amounting in average annual value to $8,504,753. Coffee formed the principal part of the trade, our imports of this product having an average value of $7,249,000 a year. Hides and skins formed the largest import after coffee, the value being $1,067,000. Cocoa worth $122,000 and crude feathers and downs worth $60,000 were the only other items of importance.

ARGENTINA.

From Argentina we imported farm produce during 1895–1899 to the average yearly value of $7,654,741. The principal articles were hides and skins, and wool. The imports of hides and skins averaged $4,325,000 a year in value, and the wool imports $2,487,000 a year. Of the remaining items the most important were: Sugar, $268,000; hair, $206,000; linseed, $161,000; and bones, hoofs, and horns, $132,000.

Digitized by Google

EGYPT.

Our agricultural imports from Egypt, consisting chiefly of cotton and sugar, had an average annual value during 1895–1899 of $6,095,171. Of Egyptian cotton we made purchases averaging $3,895,000 a year in value. Sugar formed an item of $2,134,000. The only other import of any considerable importance was hides and skins to the value of $39,000.

PHILIPPINE ISLANDS.

The Philippine Islands sent us during 1895–1899 agricultural products amounting in average annual value to $4,402,043. Manila hemp and sugar were the important items, the former averaging $3,047,000 a year in value and the latter $1,186,000 a year. Other imports recorded were: Hide cuttings and other glue stock, $4,500; volatile, or essential, oils, $2,600; goatskins, $2,100; and coffee, $2,000.

COLOMBIA.

From Colombia we imported agricultural products in 1895–1899 having an average yearly value of $4,130,083. The principal imports were coffee, fruits and nuts, and hides and skins. Of coffee there were purchases averaging $2,615,000 a year. Fruits and nuts were imported to the value of $814,000, the chief items being bananas worth $658,000, and cocoanuts worth $152,000. Of hides and skins there were imports worth $650,000. Among other imports from Colombia cocoa was the most important, the value being $35,000.

OTHER SOURCES.

The countries that have been mentioned include all the sources from which we received agricultural imports during 1895–1899 amounting in value to more than 1 per cent of the total. Of the remaining sources of supply the most important, with the average annual value of the agricultural products furnished, were as follows: Belgium, $3,335,360; Costa Rica, $3,326,163; British Australasia, $3,250,098; British Guiana, $3,230,281; European Russia, $2,889,655; Uruguay, $2,472,640; Spain, $2,269,794; Santo Domingo, $2,269,047; Porto Rico, $2,265,456, and Guatemala, $2,073,847.

Other sources from which the United States imported agricultural products during 1895–1899 averaging above $1,000,000 in annual value were Asiatic Turkey, Austria-Hungary, Aden, Salvador, European Turkey, British Africa, Dutch Guiana, and Switzerland.

AGRICULTURAL IMPORTS FROM THE TROPICS.

As has already been stated, more than one-half of the agricultural imports received by the United States during 1895–1899 came from tropical countries. The products of agriculture imported directly from countries that lie wholly or in chief part within the tropics had an

Digitized by Google

average annual value for the five years of $183,484,790, but in addition to these imports large quantities of tropical produce were received indirectly, coming as reexports from other countries.

The following table shows the value of the agricultural products imported directly from the several tropical countries during 1895–1899:

Value of the agricultural products imported into the United States from tropical countries during each fiscal year from 1895 to 1899, inclusive.

SOUTH AMERICA.

South America was the source of 23 per cent of our agricultural imports for 1895–1899, the products received from that continent having an average annual value of $82,603,247.

The value of the agricultural produce received from each of the South American countries during the five years will be seen from the following statistics:

Value of the agricultural products imported into the United States from the countries of South America during each fiscal year from 1895 to 1899, inclusive.

ASIA.

From Asia we purchased 18 per cent of the foreign agricultural produce received during 1895–1899, our imports from Asiatic countries amounting in average annual value to $65,004,737.

Following is a statement, by countries, of our agricultural imports from Asia in 1895–1899:

Value of the agricultural products imported into the United States from the countries of Asia during each fiscal year from 1895 to 1899, inclusive.

AGRICULTURAL IMPORTS, BY PRINCIPAL ARTICLES AND GROUPS.

Measured by their average annual value for 1895–1899, the leading articles[1] and groups of articles in our agricultural import trade rank in the following order: Sugar, coffee, hides and skins, wools, silk, vegetable fibers, fruits and nuts, tea, tobacco, wines, vegetable oils, and live animals. The products mentioned comprise in value nearly 90 per cent of our total agricultural imports.

The statistics of value presented in the following table show the relative importance of these leading agricultural imports for 1895–1899:

Value of the agricultural imports of the United States, by principal articles and groups, during each fiscal year from 1895 to 1899, inclusive.

SUGAR.

Our imports of sugar during 1895–1899 amounted in average annual value to $84,037,132. Cuba, Germany, the Hawaiian Islands, and the Dutch East Indies were the principal sources of supply. From Cuba we received 24 per cent of the total imports, from Germany 16 per cent, from the Hawaiian Islands 16 per cent, and from the Dutch East Indies 15 per cent. The British West Indies furnished 6 per cent, British Guiana 3.8 per cent, Brazil 2.8 per cent, Egypt 2.5 per cent, Santo Domingo 2.5 per cent, and Porto Rico 2.1 per cent. From the Philippine Islands we imported 1.4 per cent, from the United Kingdom 1.1 per cent, from Austria-Hungary 1.1 per cent, from Belgium 1.1 per cent, and from the Netherlands 1.1 per cent.

The value of the sugar imported during 1895–1899 from each of the various sources of supply will be seen from the following statistics:

Value of sugar imported into the United States from the several countries of shipment during each fiscal year from 1895 to 1899, inclusive.

COFFEE.

The coffee imports for 1895–1899 had an average yearly value of $76,562,265. Brazil was the chief contributor to our supply, furnishing 64 per cent of the total. Venezuela supplied 9.5 per cent, and Mexico 5.5 per cent. From Costa Rica we imported 3.5 per cent, from Colombia 3.4 per cent, from the Dutch East Indies 2.8 per cent, and from Guatemala 2.5 per cent. Salvador was the source of 1.8 per cent, Haiti of 1.1 per cent, and Aden of 1 per cent.

In the following table full statistics are given, by countries, regarding the value of our coffee imports for 1895–1899:

Value of coffee imported into the United States from the several countries of shipment during each fiscal year from 1895 to 1899, inclusive.

HIDES AND SKINS.

Hides and skins were imported into the United States during 1895–1899 to the average annual value of $32,712,624. Our largest purchases were made in the United Kingdom and Argentina, the former country furnishing 15 per cent of the total imports, and the latter country 13 per cent. The British East Indies supplied us with 9.3 per cent, France with 7.5 per cent, Brazil with 6.9 per cent, Germany with 6.1 per cent, Mexico with 5.1 per cent, and Uruguay with 4.6 per cent. From Canada we received 3.8 per cent, from Venezuela 3.3 per cent, from European Russia 2.7 per cent, from China 2.7 per cent, from Aden 2.6 per cent, and from Colombia 2 per cent. British Australasia sent us 1.9 per cent, Belgium 1.2 per cent, and European Turkey 1.1 per cent.

Following are detailed statistics as to the value of the hides and skins imported from the several countries during 1895–1899:

Value of hides and skins imported into the United States from the several countries of shipment during each fiscal year from 1895 to 1899, inclusive.

WOOLS.

Of wools there were average yearly imports during 1895–1899 amounting in value to $27,271,489. Nearly one-half of the imports was purchased in the United Kingdom, that country supplying 48 per cent of the total. Argentina furnished 9.1 per cent, British Australasia 8.6 per cent, and France 7.5 per cent. From China we received 5.6 per cent, from European Russia 5 per cent, from Belgium 3.4 per cent, and from Canada 3 per cent. Uruguay was the source of 2.8 per cent, Asiatic Turkey of 2.1 per cent, British Africa of 1.7 per cent, and European Turkey of 1.2 per cent.

The following table shows the value of the wool imports, by countries, for 1895–1899:

Value of wools imported into the United States from the several countries of shipment during each fiscal year from 1895 to 1899, inclusive.

SILK.

The imports of silk during 1895–1899 had an average annual value of $26,579,492. They came chiefly from four countries—Japan, China, Italy, and France. Japan furnished nearly one-half of the supply, our imports from that country forming 49 per cent of the total. From China we received 24 per cent, from Italy 21 per cent, and from France 5.6 per cent.

Our imports of silk from the countries mentioned and from other sources of supply during 1895–1899 are shown in detail by the following statistics:

Value of silk imported into the United States from the several countries of shipment during each fiscal year from 1895 to 1899, inclusive.

Countries from which imported.	Years ended June 30— 1895.	1896.	1897.	1898.	1899.	Annual average, 1895-1899.

VEGETABLE FIBERS.

Of vegetable fibers there were imports during 1895–1899 to the average yearly value of $19,888,994. Mexico was a leading source of supply, furnishing 27 per cent of the total. From Egypt we purchased 20 per cent, from the United Kingdom 17 per cent, from the Philippine Islands 16 per cent, and from the British East Indies 10 per cent. Italy supplied 2.4 per cent, European Russia 1.5 per cent, and Canada 1.2 per cent.

Following are detailed statistics as to the value of the vegetable fibers imported from the several countries of supply during 1895–1899:

Value of vegetable fibers imported into the United States from the several countries of shipment during each fiscal year from 1895 to 1899, inclusive.

FRUITS AND NUTS.

Fruits and nuts amounting in average annual value to $17,256,090 were imported during 1895–1899. The principal importations came from Italy, that country supplying 31 per cent of the total. Next to

Digitized by Google

Italy, the British West Indies were the most important source of supply, furnishing 16 per cent. From Spain we received 8.2 per cent, from France 6.3 per cent, from the United Kingdom 5.5 per cent, from Colombia 4.7 per cent, and from Asiatic Turkey 4.1 per cent. Costa Rica sent us 3.6 per cent, Greece 3.6 per cent, Honduras 3.4 per cent, and Cuba 3.3 per cent. Nicaragua was the source of 2.4 per cent, Canada of 2.4 per cent, Brazil of 1.2 per cent, and Mexico of 1.1 per cent.

The following statement shows in detail the imports of fruits and nuts from the various sources of supply during 1895–1899:

Value of fruits and nuts imported into the United States from the several countries of shipment during each fiscal year from 1895 to 1899, inclusive.

TEA.

The value of our tea imports for 1895–1899 averaged $12,088,209 a year. The direct importations from China formed 54 per cent of the total, and those from Japan 37 per cent. In the United Kingdom we purchased 5.8 per cent. The British East Indies supplied 1.8 per cent, and through Canada we imported 1.7 per cent.

In the following table detailed statistics are given as to the value of the tea imported from the various countries during 1895–1899:

Value of tea imported into the United States from the several countries of shipment during each fiscal year from 1895 to 1899, inclusive.

TOBACCO.

Our imports of tobacco during 1895–1899 had an average yearly value of $11,644,373. Cuba was the leading source of supply, furnishing 48 per cent of the total imports. From the Netherlands we received 41 per cent, consisting largely of Sumatra tobacco. Canada supplied 4.3 per cent, Germany 3.4 per cent, and Mexico 1.3 per cent.

Following is a table showing our tobacco imports, by countries, for 1895–1899:

Value of tobacco imported into the United States from the several countries of shipment during each fiscal year from 1895 to 1899, inclusive.

Countries from which imported.	Years ended June 30—					Annual average, 1895–1899.

WINES.

The value of the wines imported into the United States during 1895–1899 averaged $6,742,479 a year. France was the principal source of supply, furnishing 62 per cent of the total imports. The imports from Germany, which ranked next to those from France in impor-

Digitized by Google

tance, amounted to 18 per cent. Spain supplied 7.6 per cent, and Italy 4.1 per cent. From the United Kingdom we received 2.9 per cent, from Belgium 1.9 per cent, and from Portugal 1.6 per cent.

Statistics as to the value of the wines imported from the several countries during 1895–1899 are given in the following table:

Value of wines imported into the United States from the several countries of shipment during each fiscal year from 1895 to 1899, inclusive.

VEGETABLE OILS.

Of vegetable oils there were imports during 1895–1899 to the average annual value of $5,136,440. From the United Kingdom we imported 19 per cent of the total, from the British East Indies 19 per cent, from Italy 18 per cent, and from France 18 per cent. Germany

Digitized by Google

furnished 6.5 per cent, and the Netherlands 6 per cent. From European Turkey we received 3.1 per cent, from Hongkong 2 per cent, from China 2 per cent, from British Africa 1.6 per cent, and from Spain 1 per cent.

The following table gives full statistics, by countries, as to the value of our imports of vegetable oils during 1895–1899:

Value of vegetable oils imported into the United States from the several countries of shipment during each fiscal year from 1895 to 1899, inclusive.

LIVE ANIMALS.

The live animals imported into the United States during 1895–1899 had an average annual value of $3,857,132. Nearly 90 per cent, measured in value, came from our neighboring countries, Canada and Mexico. Canada supplied 56 per cent and Mexico 33 per cent. The

Digitized by Google

only other countries from which live animals were imported to any considerable extent were the United Kingdom and Germany. The United Kingdom furnished 5.5 per cent, and Germany 3.2 per cent.

In the following table are detailed statistics as to the value of the live animals imported from the various sources of supply during 1895-1899:

Value of live animals imported into the United States from the several countries of shipment during each fiscal year from 1895 to 1899, inclusive.

AGRICULTURAL IMPORTS, BY COUNTRIES.

The tables printed on the following pages exhibit in some detail the character and value of our agricultural import trade during 1895–1899 with the several foreign countries. The principal agricultural imports from each country have been compiled in a separate table, the articles[1] being arranged in the order of their average annual value for the five years. An alphabetical index to the countries covered by the tables will be found on pages 73–74. The tables are as follows:

Value of the agricultural imports of the United States from the several countries of shipment during each fiscal year from 1895 to 1899, inclusive.

AUSTRIA-HUNGARY.

LETTER OF TRANSMITTAL

U. S. DEPARTMENT OF AGRICULTURE,
SECTION OF FOREIGN MARKETS,
Washington, D. C., September 1, 1900.

SIR: I have the honor to transmit herewith a statistical review of our trade with Scandinavia during the fiscal years 1890–1900, and to recommend its publication as Bulletin No. 22 of this Office.

Very respectfully,

FRANK H. HITCHCOCK,
Chief.

Hon. JAMES WILSON,
Secretary.

OUR TRADE WITH SCANDINAVIA 1890-1900.[1]

GROWTH OF THE TRADE.

Among the noteworthy examples of commercial development during the past decade is that disclosed by the records of the trade carried on between the United States and the Scandinavian countries—Denmark, Sweden, and Norway.

In 1890 our exports to these three countries were valued at less than $9,000,000; in 1900 they amounted to nearly $29,000,000. The ten years subsequent to 1890 have witnessed a gain in annual value of about $20,000,000, or over 200 per cent.

Our importations from Scandinavia are comparatively small, the trade being extremely one-sided. The import value for 1890 fell below $4,000,000, and even in 1900, when the highest figures on record were reported, the value barely exceeded $5,000,000.

The balance of trade in favor of the United States increased from less than $5,000,000 in the former year to nearly $24,000,000 in the latter.

SUMMARY STATEMENT OF IMPORTS AND EXPORTS.

Following is a summary statement that shows the official[2] value of the merchandise imported and exported by the United States in the trade with Scandinavia during each fiscal year from 1890 to 1900, inclusive:

Value of merchandise imported and exported by the United States in the trade with Scandinavia (Denmark, Sweden, and Norway), during each fiscal year from 1890 to 1900, inclusive.

Years ended June 30—	Imports.			Exports.			Total imports and exports.	Excess of exports over imports.

[1]The statistical tables that form the basis of the present report were originally compiled for use in Bulletin No. 9, entitled "Trade of Denmark," but it was found that their inclusion in the bulletin mentioned would make it too large for convenience, and they are accordingly made the subject-matter of a separate publication.

[2]The statistics of importation and exportation given in the present bulletin are based on the official returns of trade published annually by the Bureau of Statistics, United States Treasury Department.

DISTRIBUTION OF THE TRADE.

Denmark is the principal factor in our Scandinavian trade, the exports to that country for 1900 having a value of more than $18,000,000, while the combined shipments to Sweden and Norway were valued at about $10,000,000. Unfortunately the official trade returns of the United States do not present separate statements of the commerce carried on with Sweden and with Norway, and it is therefore impossible to determine from our export statistics which of these two countries furnishes the larger market for American products. Judging from the customs returns published by Sweden and by Norway, however, it would seem that the latter country is at present the more important customer.

Since 1890, when our exports to Denmark were valued at little more than $5,000,000, and our exports to Sweden and Norway at less than $4,000,000, the former, according to the records of 1900, have increased over $13,000,000, and the latter about $7,000,000.

Although Denmark is the leading destination of our exports in the Scandinavian trade, our imports come chiefly from Sweden and Norway. The value of the goods purchased from these two countries during 1900 exceeded $4,000,000, while the importations from Denmark had a value of only $920,000. In the imports from Sweden and Norway, however, there was comparatively little increase during the past ten years, whereas the record of importation from Denmark shows a decided gain, the value for 1900 being more than double that reported for any year of the preceding decade.

As in the case of the exports, the United States returns of importation do not give the amounts received from Sweden and from Norway in separate statements.

The following table shows the value of the merchandise imported into the United States from Denmark, and from Sweden and Norway, during each fiscal year from 1890 to 1900, inclusive:

GENERAL CHARACTER OF THE TRADE

Of the merchandise imported into the United States from Scandinavia during 1900, only about 27 per cent consisted of agricultural produce, whereas in the case of our exports to that region products of the farm comprised about 70 per cent. The value of the agricultural products shipped to Scandinavia during the year mentioned was over $20,000,000 and that of the nonagricultural products less than $9,000,000.

Denmark's purchases of American farm produce amounted to about $15,000,000, while Sweden and Norway bought to the extent of only $5,500,000. As compared with the record for 1890, when our agricultural exports to Denmark were valued at $4,300,000 and our agricultural exports to Sweden and Norway at $1,700,000, the figures quoted for 1900 disclose a remarkable increase.

Prior to 1898 the products of agriculture imported into the United States from Scandinavia were supplied chiefly by Denmark, but during that year and 1899 Sweden and Norway contributed shipments of greater value than those received from the Danes. In 1900 our agricultural imports from each of these sources were much larger than during previous years. The value of the importations from Denmark rose to $795,000 and that of the importations from Sweden and Norway to $615,000. Our agricultural imports from Denmark formed in value 86 per cent of all the merchandise purchased from that country, but in the case of the goods received from Sweden and Norway products of the farm comprised less than 15 per cent.

The following table shows our agricultural and nonagricultural imports from Scandinavia during each of the fiscal years 1890–1900:

Imports of merchandise into the United States from Scandinavia during each fiscal year from 1890 to 1900, inclusive, classified as agricultural and nonagricultural.

AGRICULTURAL IMPORTS FROM SCANDINAVIA.

During 1900 our agricultural imports from Scandinavia had a value of $1,409,432. The principal part of this sum was credited to one item—hides and skins—the imports of which were valued at $1,216,717. Next to hides and skins wool formed the largest item. Other agricultural products imported quite extensively were rennets, seeds, cheese, and distilled spirits.

Following is a table that shows the value of the principal agricultural products imported into the United States from Scandinavia during the years 1895–1900:

Value of the principal agricultural products imported into the United States from Scandinavia during each fiscal year from 1895 to 1900, inclusive.

HIDES AND SKINS.

Our purchases of hides and skins from Scandinavia increased to a marked extent during the years 1890–1900, the total for 1900, which was decidedly the largest on record, amounting to 11,496,437 pounds. The import value, as has already been stated, was $1,216,717. No statistics of quantity were recorded for 1890, but the value reported for that year amounted to only $26,147.

Of the imports received during 1900, Denmark furnished 6,406,041 pounds, valued at $638,492, and Sweden and Norway 5,090,396 pounds, valued at $578,225.

The imports under this head from Scandinavia consist in the main of cattle hides, but goatskins are also imported in considerable quantities.

a Not stated.

WOOL.

The wool imports from Scandinavia were exceptionally large in 1900, amounting to 571,796 pounds, worth $72,657. As compared with the record for 1890, when only 40,662 pounds, worth $7,214, were imported, these figures show a marked increase.

Practically all of the wool received from Scandinavia is furnished by Denmark. During the decade 1890–1899 no imports were recorded from Sweden and Norway, but in 1900 a small consignment, amounting to 146 pounds, valued at $15, came from that source. The imports from Denmark in 1900 amounted to 571,650 pounds, worth $72,642.

RENNETS.

Denmark is the leading source of the rennets imported into the United States. Our purchases from that country during 1900 amounted in value to $40,583. The imports of rennets for 1890 were not classified according to source, but in 1891 consignments to the value of $18,535 were recorded, followed by regular shipments in the succeeding years.

The earliest year for which imports of rennets appear to have been reported from Sweden and Norway was 1893, their value being $520. Small importations were also made in each subsequent year, with the exception of 1895 and 1896. The value of the rennets purchased from Sweden and Norway in 1900 was $20, making the total importation from Scandinavia during that year amount to $40,603.

SEEDS.

Our imports of seeds from Scandinavia in 1900, valued at $23,823, showed a marked gain over the imports for 1890, which were worth only $3,006. Denmark was the principal source of supply, furnishing consignments to the value of $23,181 in 1900, while the imports from Sweden and Norway were valued at only $642.

CHEESE.

During the ten years prior to 1900 there was something of a decline in the amount of cheese imported from Scandinavia. The importations for 1899 amounted to only 49,974 pounds, valued at $6,427, as compared with 65,302 pounds, worth $7,852, imported during 1890. In 1900, however, our purchases from that source suddenly increased to 84,458 pounds, having a value of $11,421.

Sweden and Norway furnish practically all of the cheese received from Scandinavia. The imports from Denmark in 1900 amounted to only 9 pounds, worth $2.

DISTILLED SPIRITS.

Our imports of distilled spirits from Scandinavia showed a slight increase during 1890–1900, advancing from 5,196 proof gallons in the former year to 6,935 proof gallons in the latter. The value for 1890 was $7,037, as compared with $8,892 for 1900.

The larger part of the imports came from Sweden and Norway. In 1900 these countries furnished 5,957 proof gallons, worth $7,177, while Denmark supplied only 978 proof gallons, worth $1,715.

NONAGRICULTURAL IMPORTS FROM SCANDINAVIA.

According to our import statistics for 1900 the United States purchased from Scandinavia during that year $3,755,325 worth of merchandise other than products of agriculture. Among these nonagricultural commodities iron and steel formed decidedly the most important item, having an aggregate value of $1,705,872 or nearly one-half of the total.

After iron and steel in their various unmanufactured forms, the principal nonagricultural imports were wood manufactures, fish, manufactures of iron and steel, whale and fish oil, and matches.

In the following table statistics are presented as to the value of the principal nonagricultural products imported into the United States from Scandinavia during the fiscal years 1895–1900:

Value of the principal nonagricultural products imported into the United States from Scandinavia during each fiscal year from 1895 to 1900, inclusive.

IRON AND STEEL.

Our imports of iron and steel from Scandinavia declined materially during the years 1890–1900. In 1900, as previously stated, they were valued at $1,705,872, while in 1890 they amounted to $2,276,841. On the other hand, there was a decided growth in the importation of iron and steel manufactures, the annual value of this item advancing during the same period from $66,942 to $179,131. The combined value of iron and steel and their manufactures imported from Scandinavia in 1900 was $1,885,003, as compared with $2,343,783 in 1890.

The Scandinavian iron and steel purchased during 1900 came exclusively from Sweden and Norway. During the five years beginning with 1890 shipments of some importance were recorded from Denmark, but the trade of succeeding years was insignificant.

Of the iron and steel manufactures imported from Scandinavia in 1900, Sweden and Norway furnished consignments to the value of $178,099, and Denmark to the value of $1,032.

MANUFACTURES OF WOOD.

Manufactures of wood were formerly imported from Scandinavia in much larger quantities than during the past few years. The value of the importations rose from $748,770 in 1890 to $1,126,830 in 1893, and then subsequently declined to $159,793 in 1898. During 1899 there was a slight recovery to $182,036, and then in 1900 a marked increase to $627,812. Of the imports received during 1900 Sweden and Norway furnished $627,090 worth and Denmark $722 worth.

MATCHES.

Our imports of matches from Scandinavia increased from $63,444 worth in 1891, the first year for which statistics of this item were published, to $142,111 in 1895, and then declined, with some fluctuations, to $96,113 in 1900. Practically all of these imports come from Sweden and Norway.

FISH.

In our imports of fish from Scandinavia there was a decided increase during 1890–1900, the value for the latter year being $620,744, as compared with $230,408 for the former. Of the imports in 1900, Denmark supplied only $844 worth, while the consignments received from Sweden and Norway had a value of $619,900.

WHALE AND FISH OIL.

The amount of whale and fish oil received from Scandanavia during the period under consideration, although fluctuating materially from year to year, showed on the whole a considerable increase. Our imports for 1900 were recorded at 265,710 gallons, as compared with 147,824 gallons for 1890. The value increased during these years from $56,977 to $133,938. Except in the year 1899, when 3,000 gallons, worth $1,520, were received from Denmark, the entire imports during 1890–1900 were furnished by Sweden and Norway.

AGRICULTURAL EXPORTS TO SCANDINAVIA.

During 1900, as has already been shown, over $20,000,000 worth of American farm produce found a market in Scandinavia. Breadstuffs were the principal factor in the trade, our shipments under this head having an aggregate value of $9,740,350, or nearly half of the total. After breadstuffs, the principal group of exports was that comprising the various meat products, of which shipments were made to the value of $4,698,750. Of the remaining exports, the most important were oil cake, cotton, vegetable oils, molasses and sirup, tobacco, seeds, and fruits and nuts.

Following is a table that shows the value of the principal agricultural products exported from the United States to Scandinavia during each of the fiscal years 1895-1900:

Value of the principal agricultural products exported from the United States to Scandinavia during each fiscal year from 1895 to 1900, inclusive.

BREADSTUFFS.

Under the head of breadstuffs our principal exports to Scandinavia during 1900, named in the order of their value, were corn, wheat flour, wheat, rye, and oatmeal.

Corn.—Corn was decidedly the foremost article of export among the various products of agriculture sent to Scandinavia in the year mentioned. In fact, this grain formed the largest item in our entire export trade with that region. The shipments of corn to the Scandinavian countries have increased with great rapidity during recent years. In 1900 19,626,853 bushels, valued at $7,813,234, were marketed there, as compared with only 6,038,139 bushels, valued at $2,475,711, in 1890. Most of this corn goes to Denmark, the amount purchased by Sweden and Norway being comparatively small. In 1900 the two countries last mentioned took only 763,288 bushels, worth $303,597, while the consignments to Denmark were recorded at 18,863,565 bushels, worth $7,509,637.

Wheat flour.—In the amount of wheat flour shipped from the United States to Scandinavia there was an increase from 12,736 barrels, valued at $62,162, in 1890, to 217,850 barrels, valued at $780,203, in 1900, forming one of the most interesting examples of growth among our agricultural exports. Much larger quantities were sent to Sweden and Norway than to Denmark. During 1900 our consignments to the countries first mentioned amounted to 122,909 barrels, worth $469,364, as compared with an export of 94,941 barrels, worth $310,839, to Denmark.

Wheat.—Our exports of wheat to Scandinavia have been extremely irregular, depending largely upon the size of the European crop. In 1890 no exports whatever were recorded. During the succeeding years shipments were made of widely differing amounts, those of 1892, recorded at 3,010,948 bushels, worth $3,170,432, being the largest. In 1900 there was an exportation of 806,278 bushels, having a value of $633,064. Denmark bought 665,180 bushels, worth $529,338, and Sweden and Norway 141,098 bushels, worth $103,726.

Rye.—The exports of rye from the United States to Scandinavia have shown even greater fluctuations from year to year than those just described in the case of wheat. During five of the years 1890–1900 no consignments to that destination were reported, and the shipments for the other years varied widely in amount. The largest exports of the period were those for 1899, amounting to 3,020,823 bushels. Owing to a higher price during 1892, however, an export of 1,863,578 bushels in that year slightly exceeded in value the much larger shipments of 1899. In the former year the export value was $1,845,403, as compared with $1,839,927 in the latter. The record for 1900 was 272,269 bushels, valued at $163,751, and of these exports Sweden and Norway took 187,633 bushels, worth $114,473, and Denmark 84,636 bushels, worth $49,278.

Oatmeal.—During the last few years a considerable export trade in oatmeal has been established with Scandinavia. The earliest shipments appear to have been made in 1893 and amounted to only 2,400 pounds, valued at $142. The rapidity with which the trade has since grown is shown by the fact that during 1900 there was an exportation of 5,937,540 pounds, worth $121,785. Sweden and Norway were credited with the principal part of these exports, taking 4,872,160 pounds, valued at $100,262, while the shipments to Denmark amounted to 1,065,380 pounds, worth $21,523.

Bran, etc.—Another class of grain products of growing importance among our exports to Scandinavia comprises bran, middlings, and mill feed. During 1900 these products formed an item that amounted in value to $148,873, the quantity exported being 9,348 tons. Compared with the record for 1898, when only 1,175 tons, worth $17,060, were exported, these figures show a remarkable increase. Prior to 1898 the exports under this head were not stated in the official trade returns.

Denmark was the principal market, taking in 1900 8,728 tons, valued at $137,279, while only 620 tons, valued at $11,594, were sold to Sweden and Norway.

MEAT PRODUCTS.

Among the American meat products shipped to Scandinavia in 1900, the principal articles were oleo oil, lard, bacon, salted or pickled pork, and tallow.

Oleo oil.—In our exports of oleo oil to Scandinavia there has been an unusually rapid growth, giving this product first place among the meat products sent to that destination. The shipments during 1900 were recorded at 22,129,280 pounds, having a value of $1,635,100, while in 1890 there was an export of only 742,737 pounds, valued at $73,176.

Sweden and Norway took the larger part of the consignments for 1900, the shipments to these countries amounting to 13,500,332 pounds, worth $960,047, while to Denmark 8,628,948 pounds were sent, the value being $675,053.

Lard.—Lard was another article among the meat products sent to Scandinavia that showed an important increase during the past few years. The amount exported rose from 14,727,556 pounds, worth $1,019,295, in 1890, to 24,030,644 pounds, worth $1,410,990, in 1900. Owing to a decline in price, however, the gain in quantity was much more marked than that in value.

Of the lard exports for 1900, Sweden and Norway received 12,595,960 pounds, valued at $735,763, and Denmark 11,434,684 pounds, valued at $675,227.

Bacon.—During 1899 exceptionally heavy shipments of bacon were sent from the United States to Scandinavia, the total consignments amounting to 30,206,738 pounds, valued at $2,054,968. These shipments were more than three times as large as any previously recorded. In 1900 the exportation fell to 12,204,686 pounds, worth $816,530, but while the figures for that year disclose a loss of over 50 per cent com-

Digitized by Google

pared with 1899, they show a considerable gain over all prior years. The exports for 1890 amounted to only 7,566,743 pounds, worth $491,568.

Sweden and Norway formed the principal destination of the shipments for 1900, the consignments to these countries amounting to 11,488,396 pounds, with a value of $770,020, while Denmark received only 716,290 pounds, worth $46,510.

Salted or pickled pork.—Another meat product that showed a striking gain in our export trade with Scandinavia was salted or pickled pork. In 1900 the exports amounted to 3,751,357 pounds, worth $250,784, as compared with only 137,400 pounds, worth $7,374, in 1890.

Sweden and Norway furnished the principal markets, taking in 1900 2,988,100 pounds, worth $205,883, while Denmark received only 763,257 pounds, worth $44,901.

Tallow.—The amount of American tallow marketed in Scandinavia rose from 435,266 pounds, worth $20,637, in 1890, to 5,122,244 pounds, worth $241,191, in 1900, showing a marked increase. Of the shipments recorded for 1900 Sweden and Norway received 4,846,545 pounds, valued at $223,871, and Denmark 275,699 pounds, valued at $17,320.

OIL CAKE AND OIL-CAKE MEAL.

Next to corn the largest item among our agricultural exports to Scandinavia for 1900 consisted of oil cake and oil-cake meal. The shipment of these products has increased with great rapidity since 1890, advancing from 14,202,111 pounds, worth $129,596, in that year, to 273,665,772 pounds, worth $2,656,587, in 1900. Denmark furnished the principal market, the consignments to Sweden and Norway being small and extremely irregular. The largest exportation to these latter countries was that reported for 1890, amounting to 1,460,695 pounds, worth $11,736. Between 1890 and 1900 there were only three annual records of exportation. In 1900 Sweden and Norway took 246,884 pounds, valued at $2,710, while the shipments to Denmark amounted to 273,418,888 pounds, with a value of $2,653,877.

The marked increase during the last few years in our exports of oil cake and oil-cake meal to Denmark has been due chiefly to the growing use of these products as a feeding stuff for live stock in that country.

COTTON.

After corn and oil cake our next largest agricultural export to Scandinavia in 1900 was cotton. Of this product 23,381,248 pounds were sent to the destination mentioned, the value being $1,848,569. In comparison with the shipments for 1890, which were recorded at 7,539,750 pounds, worth $742,806, there was a decided increase. The exports to Denmark in 1900 amounted to 15,994,776 pounds, worth $1,251,325, while Sweden and Norway received only 7,386,472 pounds, worth $597,244.

VEGETABLE OILS.

Cotton-seed oil.—Among the vegetable oils exported from the United States to Scandinavia cotton-seed oil is decidedly the most important. The annual records from 1890 to 1900 show a marked growth in the exportation of this oil. During 1900, 692,354 gallons, worth $200,497, were shipped, while in 1890 there was an exportation of only 8,500 gallons, valued at $2,690.

Denmark takes the larger part of these exports, the quantity sent to that country in 1900 being 487,835 gallons, with a value of $143,779. The amount sent to Sweden and Norway was 204,519 gallons, and the value $56,718.

Corn oil.—Another vegetable oil that has been shipped to Scandinavia in considerable quantities during the last few years is corn oil. Prior to 1898 the exports of this oil were not separately recorded, but in that year the returns of exportation show shipments amounting to 99,108 gallons, worth $26,165. During 1899 and 1900 the exports rapidly increased, rising in the latter year to 400,850 gallons, valued at $117,345. Of the shipments recorded for 1900, 381,850 gallons, worth $111,395, were marketed in Sweden and Norway and 19,000 gallons, worth $5,950, in Denmark.

Quantity and value of corn oil exported from the United States to Scandinavia during each fiscal year from 1895 to 1900, inclusive.

a Not stated. b Annual average, 1898-1899.

Aside from the two varieties just mentioned very little vegetable oil is exported from the United States to Scandinavia. In 1900 only $425 worth of other kinds was shipped. Our total exports to the Scandinavian countries during that year amounted in value to $318,267.

MOLASSES AND SIRUP.

The item comprising molasses and sirup was one of considerable importance in our agricultural export trade with Scandinavia during 1900. In the year named 1,657,401 gallons of these products were shipped, or more than three times the exportation of 1890, which

Digitized by Google

amounted to only 513,052 gallons. The total export value increased during 1890–1900 from $113,632 to $281,671.

Of the unusually large exports in 1900 Denmark received 1,235,569 gallons, worth $215,341, and Sweden and Norway 421,832 gallons, worth $66,330.

TOBACCO.

The unmanufactured tobacco shipped from the United States to Scandinavia goes chiefly in the leaf. During 1900 the exportation of other kinds amounted in value to only $20,212. The shipments of leaf tobacco in that year had a value of $212,732, the quantity being 2,385,643 pounds. The exports for 1900 were more than twice as large as those for 1890, when shipments amounting to 1,187,577 pounds, and having a value of $121,460, were made.

Sweden and Norway took the principal part of the exports during 1900, receiving 2,272,022 pounds, worth $201,695, while only 113,621 pounds, worth $11,037, were sent to Denmark.

SEEDS.

In the exportation of seeds to the Scandinavian countries there was a marked growth during the years 1890–1900, the annual value increasing from $89,993 to $150,159.

Of the exports for 1900 Denmark received $120,995 worth and Sweden and Norway $29,164 worth.

FRUITS AND NUTS.

The years under consideration also witnessed a rapid increase in the exportation of fruits and nuts to Scandinavia. Our shipments for 1900 had a value of $131,447, as compared with exports worth only $8,947 in 1890.

Denmark furnished a market for $67,813 worth in 1900, and Sweden and Norway for $63,634 worth.

NONAGRICULTURAL EXPORTS TO SCANDINAVIA.

Of the nonagricultural commodities shipped from the United States to Scandinavia during 1900 mineral oils and manufactures of iron and steel comprised the foremost items. Measured in value these two classes of merchandise constituted more than half of the entire export trade in nonagricultural products. Of mineral oils over $3,000,000 worth was exported, and of iron and steel manufactures nearly $2,000,000 worth.

Next to these two leading items the most important exports, in the order of their value, were agricultural implements, leather, cycles,

Digitized by Google

crude iron and steel, wood in its unmanufactured forms, and fertilizers. Of the remaining nonagricultural exports those having the largest value were tobacco manufactures, copper, manufactures of cotton and other vegetable fibers, and manufactures of wood.

Following is a table that exhibits the value of the principal nonagricultural exports from the United States to Scandinavia during each of the years 1895–1900:

Value of the principal nonagricultural products exported from the United States to Scandinavia during each fiscal year from 1895 to 1900, inclusive.

MINERAL OILS.

In 1900 our exports of mineral oils to Scandinavia rose to 44,051,880 gallons, showing a decided increase over the shipments for 1890, which were recorded at only 19,757,385 gallons. The export value increased during these years from $1,480,598 to $3,171,784. The distribution of the exports during 1900 was 25,361,962 gallons, worth $1,806,690, to Sweden and Norway, and 18,689,918 gallons, worth $1,365,094, to Denmark.

Of the oils sent to Scandinavia in 1900, 43,959,452 gallons consisted of the refined or manufactured product, the value being $3,163,789. Only 92,428 gallons of crude oil, valued at $7,995, were exported. Illuminating oil, or kerosene, comprised the principal part of the

Digitized by Google

refined oil exports, the shipments of this product amounting to 42,929,601 gallons, of which 24,693,536 gallons went to Sweden and Norway, and 18,236,065 gallons to Denmark. The consignments to the latter country were worth $1,312,147, and those to Sweden and Norway $1,727,679, giving the total exports to Scandinavia a value of $3,039,826.

IRON AND STEEL.

Manufactures of iron and steel.—Another instance of rapid growth is found in the exportation of iron and steel manufactures. During 1900 our shipments under this head to Scandinavia had an aggregate value of $1,801,678, or many times the value for 1890, which was recorded at only $92,848. Of the exports for 1900, $1,004,419 worth found a market in Sweden and Norway, and $797,259 worth in Denmark.

The manufactures of iron and steel exported during 1900 covered a great variety of articles, many of which were comprised in the category known as "Machinery, machines, and parts of." Besides the various kinds of machinery and machines, including steam engines, the principal items were builders' hardware, tools, and pipes and pipe fittings.

Crude iron and steel.—Of iron and steel in its unmanufactured forms no shipments to Scandinavia were recorded until 1896, in which year there was an exportation of $150 worth. Each succeeding year witnessed a marked increase and in 1900 shipments worth $256,959 were reported. Of these exports Sweden and Norway received consignments to the value of $176,111 and Denmark to the value of $80,848. The exports under this head consisted largely of steel rails for railways, structural iron and steel, steel bars or rods, and pig iron.

The total value of the iron and steel and their manufactures exported to the Scandinavian countries in 1900 amounted to $2,058,637, of which sum $1,180,530 represented shipments to Sweden and Norway, and $878,107 shipments to Denmark.

AGRICULTURAL IMPLEMENTS.

In the exportation of agricultural implements to Scandinavia there has been a remarkable growth during the years under examination. Our exports of this class of merchandise increased from $75,973 worth in 1890 to $778,512 worth in 1900. During the latter year Denmark made purchases to the value of $480,997, and Sweden and Norway to the value of $297,515.

CYCLES.

Within the last few years a considerable export trade in cycles has been developed with the Scandinavian countries. During 1896, the first year for which figures are available, the exports amounted in value to $58,699. During 1897, 1898, and 1899 much larger shipments were made, the record for the last of these years being $818,923 worth. In 1900, however, there was a marked decline from these figures, the export value dropping to $323,412. Of the shipments for 1900, Denmark took $187,886 worth, and Sweden and Norway $135,526 worth.

Value of cycles exported from the United States to Scandinavia during each fiscal year from 1895 to 1900, inclusive.

a Not stated.

LEATHER AND MANUFACTURES OF LEATHER.

Leather.—Our exports of leather to Scandinavia during 1900 amounted in value to $673,204, as compared with $622,697 in 1890. Although the figures for the two years quoted indicate a slight increase, the average for the latter half of the decade beginning with 1890 shows a considerable falling off when contrasted with the first half. Sweden and Norway took most of the leather shipped from the United States to Scandinavia, the exports to these two countries in 1900 amounting to $522,510 worth, whereas our consignments to Denmark had a value of only $150,694.

Manufactures of leather.—While the exports of leather to Scandinavia show on an average a slight falling off, there has been a marked increase in the exportation of boots and shoes and other manufactures of leather. During 1890 our total exports of leather manufactures to that destination were valued at only $707, whereas in 1900 these articles were shipped to the value of $58,378. In the latter year Denmark purchased $31,923 worth and Sweden and Norway $26,455 worth.

The total value of the leather and leather manufactures exported from the United States to Scandinavia in 1900 amounted to $731,582, of which amount $548,965 was the value of the shipments to Sweden and Norway and $182,617 that of the shipments to Denmark.

FERTILIZERS.

During 1900 the United States exported to Scandinavia 29,592 tons of fertilizers, the value being $246,552. As compared with the record for 1890, when only 12,134 tons, worth $76,456, were shipped, these figures show a conspicuous increase. Sweden and Norway received the principal part of the exports for 1900, taking 25,089 tons, valued at $201,447, while only 4,503 tons, valued at $45,105, were sent to Denmark.

WOOD.

Unmanufactured wood.—Our exports of wood in its unmanufactured forms to Scandinavia increased from $22,409 worth in 1890 to $255,208 worth in 1900. The shipments for the latter year went chiefly to Denmark, the consignments to that country being valued at $187,267, and those to Sweden and Norway at $67,941.

Wood manufactures.—The exports of wood manufactures to the Scandinavian countries also showed a rapid increase during 1890–1900, the annual value advancing from $14,575 to $101,337. Of the exports for 1900 Sweden and Norway took $56,592 worth and Denmark $44,745 worth.

Our combined exports of wood, manufactured and unmanufactured, had an aggregate value in 1900 of $356,545. The shipments to Denmark were valued at $232,012, and those to Sweden and Norway at $124,533.

Value of wood and wood manufactures exported from the United States to Scandinavia during each fiscal year from 1890 to 1900, inclusive.

TOBACCO MANUFACTURES.

In 1900 manufactures of tobacco having a total value of $179,100 were shipped from the United States to the Scandinavian countries. As compared with the exports for 1890, which had a value of only $50,970, these figures show an important growth. Sweden and Norway furnished a market for $124,768 worth of the exports in 1900, while $54,332 went to Denmark. Cigarettes formed the principal item in these exports.

COPPER.

Our exports of copper to Scandinavia have been extremely irregular. During the years 1890–1893 there were no shipments. In 1894, consignments to the value of $20,652 were forwarded, followed by shipments in each subsequent year except 1899. The exports in 1900 were much larger than those of preceding years, amounting in value to $161,538. Although small shipments were made to Denmark in some years, the total exportation for 1900 went to Sweden and Norway.

MANUFACTURES OF COTTON AND OTHER VEGETABLE FIBERS.

Of cotton and other vegetable fibers in their manufactured forms there were exports to Scandinavia in 1900 having a value of $103,787. These figures were the largest ever reported, and showed a remarkable increase when compared with the record for 1890, which was only $27,291. Of the exports for 1900 Denmark received $83,915 worth and Sweden and Norway $19,872 worth.

TABLES SHOWING IN DETAIL OUR TRADE WITH SCANDINAVIA.

The following are detailed statistics as to the quantity and value of the various articles of merchandise imported and exported by the United States in the trade carried on with Denmark and with Sweden and Norway during each fiscal year from 1890 to 1900, inclusive. The products of agriculture and the nonagricultural commodities are separately collated in tables covering the five-year periods 1890–1894 and 1895–1899, respectively, the statistics for each period being accompanied by a statement of their annual averages. The tables are as follows:

OUR FOREIGN TRADE IN AGRICULTURAL PRODUCTS, 1891-1900.

TRADE OF 1900.

The fiscal year 1900 brought to a close a century of marvelous development in the history of United States commerce. In 1800, a century ago, the total value of the merchandise imported and exported in our trade with foreign countries was considerably less than a quarter of a billion dollars. The value of the goods exchanged during the past fiscal year reached nearly two and a quarter billions, far exceeding all previous records. Since the opening of the century our commerce with the rest of the world has increased more than twelvefold.

It was chiefly in the export trade that the enormous growth of the century occurred. Our domestic exports during 1900, with a recorded value of $1,370,763,571, were over forty times as large as in 1800. The total imports for 1900, on the other hand, amounting in value to $849,941,184, were less than ten times as large as in 1800.

Compared with the value of our imports for 1900, that of our domestic exports showed an excess of $520,822,387.

AGRICULTURAL IMPORTS.

Of the merchandise imported from foreign countries during the fiscal year 1900, about 49 per cent consisted of agricultural products. These products had an aggregate value of $420,139,288, exceeding by almost $65,000,000 the record of the year before. Hides, silk, and wool were the leading factors in the growth, although vegetable fibers, sugar, and tobacco also showed important gains. The six items mentioned contributed nearly $60,000,000 to the increase in value.

AGRICULTURAL EXPORTS.

Products of United States agriculture were marketed abroad in the fiscal year 1900 to the value of $844,616,530, forming about 62 per cent of the total domestic exports. With the single exception of 1898, the past year witnessed the largest annual export trade in farm produce on record. The value attained came within $15,000,000 of the phenomenal figures for 1898, and surpassed those for 1899 by more than $50,000,000. A considerable portion of the increase over 1899 was

Digitized by Google

accounted for by the higher price of cotton. The exports of this great staple, although actually smaller than during the preceding year, exhibited an advance of nearly $33,000,000 in value. Aside from cotton, the largest gains in value were those afforded by the exports of meat products and live stock. Tobacco, fruits and nuts, vegetable oils, oil cake and oil cake-meal, seeds, and dairy products also furnished examples of increase.

A comparison of the value of our agricultural exports for 1900 with that of our agricultural imports shows that the former exceeded the latter by $424,477,242. The export value was slightly more than double the amount of the import value.

SUMMARY STATEMENT OF IMPORTS AND EXPORTS.

The extent to which the imports and exports of the United States consisted of products of agriculture, and the excess of agricultural exports over agricultural imports, during each fiscal year from 1891 to 1900, inclusive, will be seen from the official[1] statistics presented in the following summary statement:

Value of imports and domestic exports of the United States, total and agricultural, and excess of agricultural exports over agricultural imports, during each fiscal year from 1891 to 1900, inclusive.

Years ended June 30—	Imports.			Domestic exports.			Excess of agricultural exports over agricultural imports.
	Total.	Agricultural.	Per cent agricultural.	Total.	Agricultural.	Per cent agricultural.

LEADING AGRICULTURAL IMPORTS.

Among the agricultural imports of the United States for the fiscal year 1900, the leading items, named in the order of value, were sugar, hides and skins, coffee, silk, vegetable fibers, wool, fruits and nuts,

[1] The statistics of importation and exportation given in the present bulletin are based on the official returns of trade published annually by the Bureau of Statistics, United States Treasury Department.

Digitized by Google

tobacco, tea, wines, vegetable oils, and cocoa. These twelve items comprised in value nearly 90 per cent of our entire import trade in the products of foreign agriculture during the year mentioned.

SUGAR.

Our imports of sugar during 1900 amounted to 4,018,086,530 pounds, showing an increase of 37,835,961 pounds over the quantity imported during the preceding year, which was recorded at 3,980,250,569 pounds. In the total value of the imports there was a gain of $5,286,854, the record for 1900 being $100,250,974, as compared with $94,964,120 for 1899. The average annual import price of the sugar received from abroad during the two years mentioned increased from 2.4 cents to 2.5 cents per pound.

HIDES AND SKINS.

Of hides and skins we imported during 1900 345,934,778 pounds, or 78,844,028 pounds more than in the preceding year, when our total imports amounted to only 267,090,750 pounds. The sum paid for these imports increased meanwhile from $41,988,043 to $57,935,698, a gain of $15,947,655. In the average yearly import price per pound there was an advance from 15.7 cents to 16.7 cents.

Goatskins.—Goatskins were imported during 1900 to the extent of 81,998,818 pounds, valued at $21,987,674, while in 1899 the imports amounted to only 69,728,945 pounds, valued at $18,488,326. There was a gain of 12,269,873 pounds in quantity and $3,499,348 in value. The average import price for 1900 was 26.8 cents per pound, as compared with 26.5 cents per pound for 1899.

Hides of cattle.—The amount of cattle hides imported during 1900 was 163,865,165 pounds, and the value $19,408,217. This was a gain of 33,469,145 pounds in quantity and $5,786,271 in value over the imports for 1899, which were recorded at 130,396,020 pounds, worth $13,621,946. In the average annual import price per pound there was an advance from 10.4 cents to 11.8 cents.

COFFEE.

Our imports of coffee during 1900 were smaller by 43,835,152 pounds than in 1899, the total amount purchased declining from 831,827,063 pounds to 787,991,911 pounds. In value there was a decrease from $55,275,470 to $52,467,943, making a loss of $2,807,527. The import price per pound averaged 6.6 cents for 1899 and 6.7 cents for 1900.

SILK.

In the importation of silk there was an increase from 11,250,383 pounds, worth $32,479,627, during 1899 to 13,073,718 pounds, worth $45,329,760, during 1900. The gain in quantity amounted to 1,823,335

Digitized by Google

pounds and that in value to $12,850,133. A marked advance in the average annual price, which rose from $2.89 to $3.47 per pound, was largely accountable for the heavy increase in value.

VEGETABLE FIBERS.

The vegetable fibers imported during 1900 had a total value of $34,334,750, or $9,021,511 in excess of the figures for 1899, which were recorded at $25,313,239. Chief among the fibers imported were sisal grass, cotton, and Manila hemp.

Sisal grass.—Of sisal grass we imported in 1900 76,921 tons, worth $11,782,263, as compared with 71,898 tons, worth $9,211,377, in 1899. There was an increase of 5,023 tons in quantity and $2,570,886 in value. The average annual import price advanced from $128.12 to $153.17 a ton.

Cotton.—Our imports of foreign cotton increased from 50,158,158 pounds, valued at $5,013,146, in 1899 to 67,398,521 pounds, valued at $7,960,945, in 1900, showing a gain of 17,240,363 pounds as regards quantity and of $2,947,799 as regards value. The average import price per pound showed an advance from 10 cents in the former year to 11.8 cents in the latter. Egyptian cotton formed the principal part of the imports.

Manila hemp.—The quantity of Manila hemp imported during the past year was 42,624 tons, or 10,571 tons less than the imports for 1899, which were recorded at 53,195 tons. Owing to an increase from $116.77 to $168.27 per ton in the average annual import price, however, the total value of the importations was $960,893 larger for 1900 than for the year before, the value records of the two years showing an advance from $6,211,475 to $7,172,368.

WOOL.

Our imports of wool for 1900, amounting to 155,928,455 pounds, were the largest recorded since the exceptionally heavy importations in 1897, when our receipts of this fiber from abroad reached as high as 350,852,026 pounds, having a value of $53,243,191. As compared with the quantity imported during 1899, returned at 76,736,209 pounds, the imports for the past year show a gain of 79,192,246 pounds, or over 100 per cent. The value of the imports for 1900 amounted to $20,260,936, or $11,938,039 in excess of the value for 1899, which was recorded at only $8,322,897. The marked increase in value was due partly to the fact that in 1900 the average annual import price rose to 13 cents per pound, as compared with only 10.8 cents per pound for the year preceding.

FRUITS AND NUTS.

During 1900 fruits and nuts were imported to the value of $19,263,592, this sum exceeding by $949,386 the figures for 1899, recorded

Digitized by Google

at $18,314,206. Of fruits alone, which formed the principal part of this item, there were imports valued at $15,586,664 for 1899 and $16,284,758 for 1900, the increase amounting to $698,094. Bananas and lemons were the leading varieties imported.

Bananas.—The value of our banana imports for 1900 amounted to $5,877,835, or $212,247 in excess of the 1899 figures, which were stated at $5,665,588. No statistics were returned as to the quantity of the imports.

Lemons.—Of lemons we imported 160,198,056 pounds, valued at $3,666,881, in 1900, as against 225,946,718 pounds, valued $4,398,004, in 1899. There was a falling off of 65,748,662 pounds in quantity and $731,123 in value. The average import price per pound advanced during the two years from 1.9 cents to 2.3 cents.

TOBACCO.

Our imports of tobacco for 1900 were recorded at 19,619,627 pounds, worth $13,297,223. There was a gain in quantity of 5,583,798 pounds and in value one of $3,396,970 over the imports for 1899, which amounted to 14,035,829 pounds, worth $9,900,253. The average annual import price per pound declined from 70.5 cents to 67.8 cents.

TEA.

The imports of tea were 10,755,208 pounds larger in 1900 than in 1899, our purchases having increased from 74,089,899 pounds to 84,845,107 pounds. Meanwhile the total value of the imports advanced from $9,675,081 to $10,558,110, showing a gain of $883,029. In the average annual import price there was a decline from 13.1 cents to 12.4 cents per pound.

WINES.

Wines were imported into the United States during 1900 to the value of $7,421,495, as compared with $6,590,206 during the year before. The increase amounted to $831,289.

VEGETABLE OILS.

Of vegetable oils there were imports in 1900 worth $6,320,711, or $1,020,047 above the value for 1899, which was recorded at $5,300,664.

COCOA.

Our imports of cocoa increased from 36,438,583 pounds, worth $5,360,116, during 1899, to 42,759,240 pounds, worth $5,970,844, during 1900, showing a gain of 6,320,657 pounds in quantity and in value one of $610,728. The import price per pound averaged 14.7 cents for 1899 and 14 cents for 1900.

TABLE OF LEADING AGRICULTURAL IMPORTS.

In the subjoined table are enumerated in the order of their importance such of the agricultural imports for 1900 as had a valuation exceeding $1,000,000, together with statistics exhibiting the quantity and value of each item, and the amount of increase or decrease as compared with the records of the year preceding. The list includes 31 items, and of these 24 show an increase in value for 1900, while 7 show a decrease. The table is as follows:

Quantity and value of the principal agricultural imports of the United States during the fiscal years 1899 and 1900, respectively, with amount of increase or decrease in 1900.

LEADING AGRICULTURAL EXPORTS.

In 1900, as in previous years, breadstuffs, cotton, and meat products formed the most important part of our agricultural export trade. After these three leading items, the principal exports were live animals, tobacco, oil cake and oil-cake meal, vegetable oils, fruits and nuts, dairy products, and seeds. Measured in value, the 10 items mentioned comprised over 95 per cent of our total exports of farm produce during 1900.

Digitized by Google

The following table shows the value of each of these 10 items in 1899 and 1900, with the amount of increase or decrease for 1900:

Agricultural exports (domestic) of the United States for 1899 and 1900, arranged by leading groups, with amount of increase or decrease in 1900.

BREADSTUFFS.

Our exports of breadstuffs during 1900, although far exceeding in value the average for preceding years, show a noticeable falling off compared with the exceptionally heavy shipments of 1898 and 1899. The exports for 1898, amounting in value to $333,897,119, were by far the largest on record. In 1899 the export trade amounted to $273,999,699, this value being in excess of any previously reported, except that just mentioned for 1898 and a record of $299,363,117 attained in 1892. The shipments during 1900 were valued at $262,744,078, or $11,255,621 less than the figures returned for 1899.

As in the preceding year, the decline in the export value of breadstuffs recorded for 1900 was traceable chiefly to a falling off in the shipments of wheat. Accompanying the decline in wheat shipments there was a further marked increase in the exports of corn, and for the first time in the history of the trade the total export value of corn exceeded that of wheat.

Indian corn.—In both quantity and value our exports of Indian corn for 1900 were the largest ever reported, amounting to 209,348,284 bushels, worth $85,206,400. Compared with the shipments for 1899, which were recorded at 174,089,094 bushels, worth $68,977,448, the 1900 exports were greater in quantity by 35,259,190 bushels and in value by $16,228,952. The average annual export price per bushel showed a slight increase for 1900, the quotation for that year being 40.7 cents as against 39.6 cents for 1899.

Wheat.—During 1900 we shipped to foreign markets 101,950,389 bushels of wheat, the total value being $73,237,080. As compared with the exports for 1899, which amounted to 139,432,815 bushels, worth $104,269,169, these shipments exhibit a falling off of 37,482,426 bushels in quantity and $31,032,089 in value. The export price for

Digitized by Google

1900 averaged 71.8 cents per bushel, or just 3 cents lower than the price of the year preceding, which was recorded at 74.8 cents per bushel.

Wheat flour.—Although the year 1900 witnessed a decline in our shipments of wheat, there was a slight increase in the amount of wheat flour sent abroad, the exports of this product amounting to 18,699,194 barrels, as compared with 18,485,690 barrels in 1899. This was a gain of 213,504 barrels. Owing, however, to a material decline in the average export price, which dropped from $3.95 per barrel during 1899 to $3.62 per barrel during 1900, the total value of the exports suffered a considerable decrease, falling during the two years from $73,093,870 to $67,760,886, the loss being $5,332,984.

The wheat flour exports of 1899, converted into their equivalent in grain, were equal to 83,185,605 bushels of wheat, and, similarly, the wheat flour exports of 1900 were equal to 84,146,373 bushels of wheat. In the former year the combined exports of wheat and wheat flour amounted to 222,618,420 bushels of grain, and in the latter year to 186,096,762 bushels of grain, exhibiting for 1900 a total falling off of 36,521,658 bushels as compared with 1899. The combined value of the wheat and wheat flour exports, amounting to $177,363,039 in 1899 and $140,997,966 in 1900, showed a decline of $36,365,073.

Oats.—In the exportation of oats there was a considerable growth during 1900, the shipments for that year amounting to 41,369,415 bushels, worth $12,504,654, as compared with 30,309,778 bushels, worth $9,787,540, for the year preceding. The gain in quantity amounted to 11,059,637 bushels, and that in value to $2,717,114. In the average annual export price there was a decline from 32.3 cents to 30.2 cents per bushel.

Barley.—During 1900 barley was exported more extensively than in any previous year, the total shipments reaching as high as 23,661,662 bushels, worth $11,216,694. The largest previous exports occurred in 1897, when 20,030,301 bushels, worth $7,646,384, were marketed abroad. In the following year, 1898, the exports declined to 11,237,077 bushels, with a value of $5,542,040, and in 1899 a still further decrease was recorded, the shipments for that year falling as low as 2,267,403 bushels, with a value of $1,375,274. As compared with the 1899 figures the record for 1900 shows an increase of 21,394,259 bushels in quantity and $9,841,420 in value. The average annual export price per bushel fell during the last two years from 60.7 cents to 47.4 cents.

Rye.—Concurrent with the increase in barley exports there was a marked falling off during 1900 in the amount of rye sent to foreign countries. Our shipments of rye for that year amounted to only 2,355,792 bushels, worth $1,442,055, as against 10,140,866 bushels, worth $5,936,078, for 1899. There was a decrease of 7,785,074 bushels

Digitized by Google

in quantity and $4,494,023 in value. An increase from 58.5 cents to 61.2 cents per bushel occurred in the average annual export price.

COTTON.

The amount of American cotton supplied to foreign countries during 1900 was somewhat less than in the preceding year, the export record being 3,126,225,588 pounds as against 3,787,719,122 pounds for 1899. This was a falling off of 661,493,534 pounds. Owing to an advance in the average yearly export price from 5.5 cents per pound to 7.8 cents per pound, however, the total value of the shipments showed an increase from $210,089,576 in 1899 to $242,988,978 in 1900, making a gain of $32,899,402.

MEAT PRODUCTS.

In the exportation of meat products during the past year there was an increase of $7,072,305 over the exceptionally high figures of 1899, the total value of the consignments sent to foreign markets in 1900 reaching as high as $173,751,471, and thus surpassing all previous records. The value for 1899, which was the highest previously reported, amounted to $166,679,166. The principal gain occurred in the group of articles classed as beef products, the export record for this group in 1900 being 523,288,975 pounds, valued at $42,170,407, as compared with 476,030,644 pounds, valued at $34,087,614, in 1899. The increase amounted to 47,258,331 pounds in quantity and $8,082,793 in value. Fresh beef contributed the chief part of this gain.

In the exports of hog products, on the other hand, there was a falling off of 140,241,179 pounds as regards quantity, and $3,019,926 as regards value. The shipments of this group of products were recorded at 1,538,024,466 pounds, worth $112,159,417, for 1900, as against 1,678,265,645 pounds, worth $115,179,343, for 1899. Bacon and lard were the principal factors in this decline. The exports of hams showed a rather marked falling off in quantity, but owing to an advance in price, the decrease in total value was small. The shipments of salted or pickled pork exhibited a decline in quantity, while in value there was a slight increase.

Aside from the various hog and beef products mentioned, oleo oil formed the most important item under the head of meat products. The exports of oleo oil for 1900 showed a noticeable increase in both quantity and value.

Lard.—Lard was exported in 1900 to the extent of 661,813,663 pounds, worth $41,939,164. As compared with the shipments for 1899, recorded at 711,259,851 pounds, worth $42,208,465, these figures show a decline of 49,446,188 pounds in quantity and $269,301 in value. The average annual export price per pound advanced during the two years from 5.9 cents to 6.3 cents.

Bacon.—The falling off in our exports of bacon for 1900 as compared with 1899 amounted in quantity to 50,497,751 pounds, and in value to $2,581,152. The record for 1900 was 512,153,729 pounds, worth $38,975,915, while that for 1899 reached 562,651,480 pounds, worth $41,557,067. In the average annual export price there was an advance from 7.4 cents per pound to 7.6 cents per pound.

Hams.—In the quantity of hams exported there was a decline from 225,846,750 pounds during 1899 to 196,414,412 pounds during 1900, making a loss of 29,432,338 pounds. Notwithstanding this marked decrease in the volume of the exports, an advance from 9.2 cents to 10.4 cents per pound in the average annual price prevented any considerable falling off in the total value, the record for 1900 being $20,416,367, or only $357,717 less than the value for 1899, reported at $20,774,084.

Salted or pickled pork.—The exports of salted or pickled pork amounted to 133,199,683 pounds, worth $8,243,797, in 1900, as against 137,197,200 pounds, worth $7,917,066, in 1899. These figures show a falling off of 3,997,517 pounds as regards quantity and an increase of $326,731 as regards value. In the average annual export price there was an advance during the two years from 5.8 cents to 6.2 cents per pound.

Fresh beef.—The growth of our export trade in fresh beef during 1900 was an important one, the shipments for that year amounting to 329,078,609 pounds as compared with only 282,139,974 pounds for the year before. This was a gain of 46,938,635 pounds. In value there was an advance during the two years from $23,545,185 to $29,643,830, making a gain of $6,098,645. The average annual export price per pound was quoted at 9 cents for 1900, while in 1899 it was only 8.3 cents.

Oleo oil.—In the exportation of oleo oil there was an increase from 142,390,492 pounds, worth $9,183,659, in 1899, to 146,739,681 pounds, worth $10,503,856, in 1900. The gain in quantity amounted to 4,349,189 pounds and that in value to $1,320,197. The average annual export price per pound rose from 6.4 cents to 7.2 cents.

LIVE ANIMALS.

Our exports of live stock of various kinds during 1900 amounted in total value to $43,585,031, exceeding by $5,704,115 the figures for 1899, which were recorded at $37,880, 916.

Cattle.—Of American cattle 397,286 head were sent abroad last year, or 7,796 head in excess of the shipments for 1899, which amounted to 389,490 head. The value of the cattle exported increased during the two years from $30,516,833 to $30,635,153, a gain of $118,320. In 1899 the average export price per head was $78.35, and in 1900 $77.11.

Digitized by Google

Horses.—The number of American horses shipped to foreign countries during 1900 was 64,722, while in 1899 it was only 45,778. Accompanying this gain of 18,944 in number, there was an increase of $2,168,274 in value, the total export valuation advancing during the two years from $5,444,342 to $7,612,616. The average export price per head amounted to $118.93 for 1899 and to $117.62 for 1900.

TOBACCO.

Tobacco in its various unmanufactured forms, including stems and trimmings, was exported during 1900 to the value of $29,422,371, showing a gain of $3,955,153 over the figures for 1899, which were recorded at $25,467,218.

Leaf tobacco.—Of leaf tobacco, which was the principal item, there were exports amounting in 1900 to 334,604,210 pounds, worth $29,163,086, as compared with only 272,421,295 pounds, worth $25,170,771, in 1899. The quantity of the exports was increased by 62,182,915 pounds and their value by $3,992,315. In the average annual export price per pound there was a decline from 9.2 cents to 8.7 cents.

OIL CAKE AND OIL-CAKE MEAL.

The exports of oil cake and oil-cake meal for 1900, amounting to 1,631,723,300 pounds, worth $16,806,302, were the largest on record, exceeding by 62,630,167 pounds in quantity and $2,257,537 in value the exceptionally high figures of 1899, during which year 1,569,093,133 pounds, worth $14,548,765, were exported. In the average annual export price per pound there was an advance from 0.9 cent to 1 cent.

VEGETABLE OILS.

The total value of the vegetable oils exported during 1900 reached $16,345,056, or $2,535,721 in excess of the preceding year's value, recorded at $13,809,335. The principal item under this head was cotton-seed oil.

Cotton-seed oil.—In the exports of cotton-seed oil, amounting during 1900 to 46,902,390 gallons, there was a falling off of 3,724,829 gallons as compared with 50,627,219 gallons shipped the year before, but owing to an advance from 23.9 cents to 30.1 cents in the average annual export price per gallon, the total value of the shipments increased during the two years from $12,077,519 to $14,127,538, showing a gain of $2,050,019.

FRUITS AND NUTS.

In the exportation of fruits and nuts there was a decided growth during 1900, the total value of the shipments for that year amounting to $11,642,662, as compared with only $7,897,485 for the year before. This was a gain of $3,745,177. Fruits formed the principal part of this

Digitized by Google

item, having a value of $7,757,235 in 1899 and one of $11,486,172 in 1900. In the export value of fruits alone there was an increase amounting to $3,728,937.

DAIRY PRODUCTS.

A considerable increase also occurred during the past year in our total exports of dairy products. The value of these exports as recorded for 1900 was $9,226,520. This was a gain of $1,597,309 over the value for the preceding year, which came to only $7,629,211.

Cheese.—Of cheese there were shipments during 1900 to the extent of 48,419,353 pounds, worth $4,943,609. Compared with only 38,198,-753 pounds, worth $3,316,049, for the year before, these figures show a gain of 10,220,600 pounds in quantity and $1,627,560 in value. The average annual export price advanced from 8.7 cents per pound to 10.2 cents per pound.

Butter.—In the exports of butter, on the other hand, there was a slight falling off during 1900. The shipments for that year amounted to only 18,266,371 pounds, valued at $3,143,509, as against 20,247,-997 pounds, valued at $3,263,951, for 1899. The quantity exported declined 1,981,626 pounds and the value $120,442. In the average annual export price per pound there was an advance from 16.1 cents to 17.2 cents.

SEEDS.

Our exports of seeds for 1900 had a total value of $7,036,982, or $1,957,586 above the figures for 1899, which were recorded at $5,079,-396. The increase was due chiefly to larger exports of clover seed and flaxseed.

TABLE OF LEADING AGRICULTURAL EXPORTS.

The table given below enumerates in the order of their importance such of the agricultural exports for 1900 as had a valuation exceeding $1,000,000, and states the quantity and value exported in that year and in the year before, together with the amount of increase or decrease. Of the 44 items covered by the table 33 exhibit a gain in value for 1900, while 11 exhibit a decline. The table is as follows:

a Including stearin in 1900.

AGRICULTURAL IMPORTS AND EXPORTS CLASSIFIED AS ANIMAL MATTER AND VEGETABLE MATTER.

As a convenient basis of classification the various articles comprising our agricultural imports and exports may be grouped under two general heads—animal matter and vegetable matter.

Digitized by Google

AGRICULTURAL IMPORTS.

The relative standing of these two categories in our agricultural imports during each fiscal year from 1891 to 1900, inclusive, is shown by the following statement:

Agricultural imports of the United States during the fiscal years 1891 to 1900, inclusive, classified as animal matter and vegetable matter.

AGRICULTURAL IMPORTS AND EXPORTS IN DETAIL.

A detailed statement of the agricultural imports[1] and exports of the United States during each fiscal year from 1891 to 1900, inclusive, embracing all such commodities as may reasonably be classed in the agricultural category, is presented in the following tables:

[1] In comparing the yearly import returns for 1891–1900, tariff changes should be taken into account. The tariff law of 1883 was in force until October 6, 1890. At that date the tariff of 1890 became law, remaining in effect until August 27, 1894, when it was superseded by the tariff law of 1894. The latter law continued in force until July 24, 1897, at which date the present tariff became operative.

IMPORT AND EXPORT PRICES.

To supplement the statistics of importation and exportation already presented the following tables are appended, showing for each of the ten fiscal years under consideration the average import and export prices of the various agricultural products[1] enumerated:

[1] The articles enumerated in the following tables of prices are the same as those given in the import and export tables printed on pages 21–46, and they should be read in the light of the footnotes with which they are there accompanied.
